ABSTRACT

The second volume of the third annual National Education Goals Report contains profiles of the achievements of each state, the District of Columbia, and five territories toward the National Education Goals of 1990, which derived from the National Education Summit of 1989. In brief, the goals for achievement by the year 2000: (1) all children in America will start school ready to learn; (2) the high school graduation rate will increase to at least 90 percent; (3) American students will leave grades 4, 8, and 12 having demonstrated competence in particular areas, prepared for responsible citizenship; (4) U.S. students will be first in the world in science and mathematics achievement; (5) every adult will be literate and possess the knowledge and skills needed in a global economy; and (6) every school will be free of drugs and violence. The profile for each state summarizes indicators for each of the six goals, with tabulated data and a bar graph for each goal for which information is available. The four-page profile for each state lists (1) direct measures of the goal; and (2) measures of the objectives. When available, baseline and 1993 Goals Report data are provided. Appended are 24 references and technical notes relating to the statistical data. (SLD)

Foreword

The National Education Goals remain at the forefront of the movement to *build a nation of learners*. In the past year, the Presidency changed hands, as have over half the Governorships in the four years since the Education Summit in Charlottesville, Virginia. These changes serve to underscore the continuity, bipartisanship, and long-term nature of the National Goals process.

Where vision and commitment count the most, however, is at the community and neighborhood levels. Only through an enduring partnership of families, educators, employers, and other dedicated citizens can America's learning enterprise — our local schools — be transformed to help *all* our children reach their full potential. Only then will we become a nation of lifelong learners. And only then can we be confident of meeting the competition in this global economy, assuring a high quality of life, and preserving our democratic system and ideals.

This Report continues our commitment to let the American people know the results we are getting in education. We strive to present the facts plainly, this year in two volumes: Volume 1 describes our educational standing as a nation, while Volume 2 profiles performance in the individual states. We also offer a vision of how high standards can help mobilize grass-roots partnerships and move the United States toward quality education. And continue to move forward we must — at an accelerated pace — in order to attain the Goals by the year 2000.

Over the past year, the National Education Goals Panel has worked hard to bring the Goals and the vision of high-performance learning for *all* to this nation's communities. The theme for this third annual Report, "Setting Standards, Becoming the Best," highlights that outreach and partnership effort. Along with state and local goals, vision documents, and progress reports, we hope this Report will become a tool for continuous improvement.

Sincerely,

E. Benjamin Nelson, Chair
(August 1992 - August 1993)

The National Education Goals

Goal 1: By the year 2000, all children in America will start school ready to learn.

Objectives:

- All disadvantaged and disabled children will have access to high quality and developmentally appropriate preschool programs that help prepare children for school.
- Every parent in America will be a child's first teacher and devote time each day helping his or her preschool child learn; parents will have access to the training and support they need.
- Children will receive the nutrition and health care needed to arrive at school with healthy minds and bodies, and the number of low-birthweight babies will be significantly reduced through enhanced prenatal health systems.

Goal 2: By the year 2000, the high school graduation rate will increase to at least 90 percent.

Objectives:

- The nation must dramatically reduce its dropout rate, and 75 percent of those students who do drop out will successfully complete a high school degree or its equivalent.
- The gap in high school graduation rates between American students from minority backgrounds and their non-minority counterparts will be eliminated.

Goal 3: By the year 2000, American students will leave grades four, eight, and twelve having demonstrated competency in challenging subject matter, including English, mathematics, science, history, and geography; and every school in America will ensure that all students learn to use their minds well, so they may be prepared for responsible citizenship, further learning, and productive employment in our modern economy.

Objectives:

- The academic performance of elementary and secondary students will increase significantly in every quartile, and the distribution of minority students in each level will more closely reflect the student population as a whole.
- The percentage of students who demonstrate the ability to reason, solve problems, apply knowledge, and write and communicate effectively will increase substantially.
- All students will be involved in activities that promote and demonstrate good citizenship, community service, and personal responsibility.
- The percentage of students who are competent in more than one language will substantially increase.
- All students will be knowledgeable about the diverse cultural heritage of this nation and about the world community.

Goal 4: By the year 2000, U.S. students will be first in the world in science and mathematics achievement.

Objectives:

- Math and science education will be strengthened throughout the system, especially in the early grades.
- The number of teachers with a substantive background in mathematics and science will increase by 50 percent.
- The number of U.S. undergraduate and graduate students, especially women and minorities, who complete degrees in mathematics, science, and engineering will increase significantly.
- The number of quality programs, including those at libraries, that are designed to serve more effectively the needs of the growing number of part-time and mid-career students will increase substantially.
- The proportion of those qualified students (especially minorities) who enter college, who complete at least two years, and who complete their degree programs will increase substantially.
- The proportion of college graduates who demonstrate an advanced ability to think critically, communicate effectively, and solve problems will increase substantially.

Goal 5: By the year 2000, every adult American will be literate and will possess the knowledge and skills necessary to compete in a global economy and exercise the rights and responsibilities of citizenship.

Objectives:

- Every major American business will be involved in strengthening the connection between education and work.
- All workers will have the opportunity to acquire the knowledge and skills, from basic to highly technical, needed to adapt to emerging new technologies, work methods, and markets through public and private educational, vocational, technical, workplace, or other programs.
- Every school will implement a firm and fair policy on use, possession, and distribution of drugs and alcohol.
- Parents, businesses, and community organizations will work together to ensure that schools are a safe haven for all children.
- Every school district will develop a comprehensive K-12 drug and alcohol prevention education program. Drug and alcohol curriculum should be taught as an integral part of health education. In addition, community-based teams should be organized to provide students and teachers with needed support.

Goal 6: By the year 2000, every school in America will be free of drugs and violence and will offer a disciplined environment conducive to learning.

Objectives:

Introduction

This third annual National Education Goals Report continues an unprecedented process of national education renewal begun at the Charlottesville Education Summit in 1989. Four years ago the nation's Governors and the President agreed on six national Goals for education to be achieved by the year 2000. The Goals were intended to energize public opinion and ongoing education reform efforts by holding us to much higher expectations for all students and for the schools and learning systems that serve them. The Governors and the President envisioned a system that would be "world-class" from early childhood through adulthood. Specifically, they challenged all of us to expect that by the beginning of the next century:

1. All children in America will start school ready to learn.
2. The high school graduation rate will increase to at least 90 percent.
3. American students will leave grades four, eight, and twelve having demonstrated competency in challenging subject matter, including English, mathematics, science, history, and geography; and every school in America will ensure that all students learn to use their minds well, so they may be prepared for responsible citizenship, further learning, and productive employment in our modern economy.
4. U.S. students will be first in the world in science and mathematics achievement.
5. Every adult American will be literate and will possess the knowledge and skills necessary to compete in a global economy and exercise the rights and responsibilities of citizenship.
6. Every school in America will be free of drugs and violence and will offer a disciplined environment conducive to learning.

The Initial Challenge: Creating a National Goals Accountability Process

The President and the nation's Governors understood that creating national education goals would prove a hollow gesture without also establishing a process for holding the nation and the states account-

able for their attainment. They established the National Education Goals Panel to be at the center of that process. The Panel is comprised of eight Governors, two senior national Administration officials, and four members of Congress. Representation is balanced equally among Democrats and Republicans. This unique intergovernmental and bipartisan partnership is indicative of a commitment to a results-based national goals accountability system that transcends levels of governance and political affiliation. Significantly, the Goals Panel has continued through two national Administrations of opposite political parties.

Since its creation in July of 1990, the Panel has worked hard to lay a foundation upon which to build a cumulative record of progress. Each year at the anniversary of the Charlottesville Summit, the Panel issues a comprehensive report to the nation on the progress being made in achieving each of the six National Education Goals. The purpose of these reports is not measurement for measurement's sake, but rather to reinforce our common commitment to the National Goals process by clearly revealing where we have made progress and where we need to work harder.

With the encouragement and support of the Goals Panel, states and local communities throughout the nation have begun to create their own new education reporting mechanisms for charting their progress in achieving the National Education Goals. They also continue to organize their education reform strategies around the Goals framework.

The Challenges Ahead: Developing Voluntary Nationwide Standards and Communicating with the American People

This third annual National Goals Report focuses on the rationale for and potential implications of the movement it has come to be most closely associated with: establishing voluntary nationwide education standards. The creation of a central framework and structure for reporting progress on the National Education Goals was a major initial accomplishment of the Panel. Early on, however, the Panel recognized that for the Goals to be achieved, clear nationwide standards, reflecting what it is we want *all* students to know and be able to do, needed to be developed. In 1991, the Panel helped to create the National Council on Education Standards and Testing (NCEST) and later endorsed the Council's recommendations for

nationwide standards-setting and related new systems of student assessment.

The publication of the NCEST Report in January 1992 led to an explosion of new efforts to define education standards at the national, state, and local levels. Because of these efforts, there will soon be a common understanding of the content knowledge we want all children and young people to master. Associations, researchers, educators, and policymakers are working together to establish content standards in major subject areas—mathematics, science, history, geography, language arts, foreign languages, and the arts. In addition, the best professional knowledge is being applied to another important task—to create performance standards, or determining how good is good enough in learning content in the different subjects.

The Goals Panel will continue to be integral to these efforts and is confident that they place us on a trajectory for achieving the National Education Goals. We also believe, however, that for standards-based reform to actually lead to accomplishing the Goals, we should follow five critical principles:

1. **The development of nationwide standards must be highly inclusive, blending expert classroom knowledge with that of researchers, policymakers, and the general public.** Previous attempts to set education standards have taught us that for this process to succeed, no single individual, group, or constituency can establish them. What is needed is a broad-based national dialogue of what we should expect all our students to know and be able to do, out of which an informed consensus can emerge.
2. **The standards must not be considered a uniform national curriculum.** Rather, they should be viewed as guides and goals, establishing criteria for the development of unique and independent state and local curricula and instructional practices.
3. **The standards must be deliberately set at high levels.** After more than ten years of intensive attempts to reform American public education, two compelling facts are evident — expectations for student achievement have been disastrously low for all students, and these low expectations play a critical role in explaining our poor educational performance. The National Education Goals and the nationwide standards-setting process must commit us to high levels of mastery of knowledge by every child.

4. **The standards must be viewed as dynamic, subject to periodic review and change.** Standards should be reviewed and modified at regular intervals so that American students keep pace with the growth of knowledge.

5. **The importance of nationwide standards must be clearly and effectively communicated to the American people.** We have started a crucial effort that will only be successful if the public is committed to it. The American people must understand that the nationwide standards movement has the potential to give every child an excellent education. They must view the standards as a platform that can raise the level of education for all children, rather than as a gate that allows some in and keeps others out.

The National Education Goals Panel is committed to promoting these principles. It plans to work along with a new National Education Standards and Improvement Council and others to develop criteria and a process for reviewing and approving nationwide standards that are consistent with these criteria, and to educate the public on the subject of nationwide standards.¹ The Panel already has begun initial efforts in this regard by soliciting recommendations for standards review criteria and procedures from one of its commissioned Task Forces and by focusing this third Goals Report on the nature, importance, and future of the nationwide standards-setting movement.

With this third annual Report, the Goals Panel also begins its most concerted effort to date to communicate with the American people about the importance of the National Education Goals, the work of the Panel, and the relevance of these efforts to all Americans. It is clear that our efforts have had a major positive influence on the education reform movement and its emphasis on new systems of accountability and high standards. And key Panel findings, such as those published last year on international comparisons of student achievement and attitudes about educational performance, have served to reinforce among the education policy community the need for fundamental education reform and restructuring.

However, while this is gratifying, knowledge and commitment on the part of our education leaders is not enough. The National Education Goals can only be met with adequate understanding and commitment by the American people. This public commitment does not yet exist. For example, according to recent studies by the Public Agenda Foundation, the general

¹ The specific nature of Panel efforts in this regard will await the disposition of legislation currently before Congress.

public believes that a top education priority is to make sure that all students graduate with at least an eighth-grade education. However, the Goals Panel and other education leaders have consistently emphasized the need for all students to learn at demonstrably higher levels, so that the nation will be strong and prosperous in an increasingly skilled and global economy.

The Goals Panel is working to bridge this perception gap. Evidence of this new thrust is seen in the opening Report chapter, "Setting Standards: Being the Best," which describes for citizens the meaning and importance of "world-class" nationwide education standards. The Executive Summary has a new format this year that focuses on the importance and implications of key Panel findings on our progress in achieving the National Goals for parents and citizens. These changes, as well as other modifications to improve the readability of this Goals Report, should be viewed as precursors to sustained efforts planned for the coming year to increase public understanding of, and support for, the National Education Goals process.

In future months, the Panel will continue to strengthen its activities to underscore for the American people how world-class standards can improve the quality and nature of learning. It also will engage in other efforts designed to stimulate informed bottom-up, community-based reform that addresses local needs within the context of national priorities.

Key 1993 Goals Report Findings

As in the past, this third annual Goals Report contains the most up-to-date information currently available on our current status relative to meeting the six National Goals. It builds upon the information presented in the previous two years, and includes new findings on the status of American education. Overall, the findings continue to reveal how far we are from achieving the Goals. They show modest progress in some areas (mathematics achievement, school safety), but stagnation or movement in the wrong direction in others (high school completion, adult literacy).

Overall, this Report shows that the current rate of progress is wholly inadequate if we are to achieve the National Education Goals by the year 2000:

- New analyses conducted for the Goals Panel show that nearly one-half of all infants born in the

United States begin life with one or more factors (such as tobacco or alcohol use by their pregnant mothers) that are considered risky to their long-term educational development.

- While increasing markedly in the early 1980s, the high school completion rate among 19- and 20-year-olds has been relatively stable since then, and remains short of the national Goal of 90 percent.
- Between 1990 and 1992, the percentages of students in Grades 4 and 8 who met the Goals Panel's performance standard in mathematics increased, but the percentages are still low—about one out of every five students in Grade 4 and one out of every four students in Grade 8. Only one in four fourth grade students met the Goals Panel's performance standard in reading.
- The literacy of young adults (aged 21-25) has slipped since the mid-1980s. The average scores of young adults on such tasks as understanding and using information from a newspaper or a pamphlet, locating information in a chart or map, or using mathematics in everyday situations were slightly lower in 1992 than the average scores of young adults seven years earlier.
- While the incidence of students being victimized at school appears to have declined modestly in recent years, the levels are still unacceptably high. About one in five 8th graders reported being threatened with a weapon in 1992, while about one out of ten said that they carried a weapon with them onto the school grounds.

Before the adoption of the National Goals, the information we had on the performance of our educational system was fractured at best, woefully incomplete, and often misleading. Given this condition, it is no wonder that we supported for too long a system that was not living up to its potential nor allowing all our children to fulfill theirs. This third National Goals Report reflects the Panel's continued and sustained commitment to evaluate our performance fully and frankly. By documenting, without equivocation, how much more effort is needed from all Americans to ensure a world-class education for all, we are creating the conditions necessary for a significant renewal of American education.

State Indicators on the Goals and Objectives

2000

1993

ALABAMA

Measuring State Progress Toward the Goals and Objectives

Goal 1: Children's Health Index
Percentage of infants born in the state with 1 or more health risks¹ (1990)

¹ Includes late (in third trimester) or no prenatal care, low maternal weight gain (less than 21 pounds), three or more older siblings, mother smoked during pregnancy, mother drank alcohol during pregnancy, or closely spaced birth (within 18 months of previous birth).

Goals
Report

Goal 1: Readiness for School**Direct Measures of the Goal: School Readiness**

No direct measure of children's early development and learning during the kindergarten year is available yet.

Direct Measures of the Objectives: Children's Health and Nutrition

- Number of births (per 1,000; 1988, 1990):¹

a) at or above 5.5 pounds	920	916
b) between 3.3 and 5.5 pounds	64	68
c) below 3.3 pounds	16	16
- Number of mothers (per 1,000; 1988, 1990) receiving first prenatal care during:²

a) first trimester of pregnancy	731	735
b) second trimester of pregnancy	205	204
c) third trimester of pregnancy or never	64	61
- Percentage of infants born in the state with one or more of the following health risks (1990):³ ▲

– late (in third trimester) or no prenatal care		
– low maternal weight gain (less than 21 pounds)		
– three or more older siblings		
– mother smoked during pregnancy		
– mother drank alcohol during pregnancy		
– closely spaced birth (within 18 months of previous birth)		
a) no risks	—	54%
b) 1 or more risks	—	46%
c) 2 or more risks	—	14%
d) 3 or more risks	—	4%

Direct Measures of the Objectives: Preschool Programs

- Number of children with disabilities in preschool (per 1,000 3- to 5-year-olds; 1991, 1992)⁴

41	45
----	----

Goal 2: High School Completion**Direct Measures of the Goal: High School Completion**

- Percentage of all adults with a high school credential (1990):⁵

a) 19- to 20-year-olds	82%	—
b) 23- to 24-year-olds	80%	—

1993
Goals
Report

Goal 3: Student Achievement and Citizenship

Direct Measures of the Goal: Student Achievement

- Percentage of all public school students who scored at the Proficient or Advanced level in mathematics, thus meeting the Goals Panel's performance standard (1990, 1992).⁷ ■

- Grade 4	—	10%
- Grade 8	12%	12%
- Percentage of all public school students who scored at the Proficient or Advanced level in reading, thus meeting the Goals Panel's performance standard (1990, 1992).⁸ ■

- Grade 4	—	17%
-----------	---	-----

Direct Measures of the Goal: Advanced Placement Participation and Performance

- Number of Advanced Placement examinations taken in the following subject areas (per 1,000 11th and 12th graders; 1991, 1993).⁹

- English, mathematics, science, and history	53	61
Number receiving grades of 3 or higher	27	31
- Foreign languages	1	1
Number receiving grades of 3 or higher	1	1
- Fine arts	1	1
Number receiving grades of 3 or higher	1	1

Additional Important Information: Participation in Challenging Courses

- Estimated percentage of public high school students taking the following courses (1989, 1991).¹⁰

- Algebra I	70%	83%
- Algebra II	46%	50%
- Calculus	6%	7%
- Biology	95+%	95+%
- Chemistry	38%	43%
- Physics	21%	16%

Goal 3: Mathematics Achievement

Percentage of all public school students who met the Goals Panel's performance standard¹ in mathematics (1990, 1992)

¹ The Goals Panel's performance standard is "mastery over challenging subject matter" as indicated by performance at the Proficient or Advanced levels on the National Assessment of Educational Progress (NAEP). These levels were established by the National Assessment Governing Board (NAGB) and reported by the National Center for Education Statistics (NCES) in recent NAEP publications. A more complete description of the performance standard can be found in Appendix B.

Measuring State Progress Toward the Goals and Objectives

Baseline
1993
Goals
Report

Goal 1: Readiness for School

Direct Measures of the Goal: School Readiness

No direct measure of children's early development and learning during the kindergarten year is available yet.

Direct Measures of the Objectives: Children's Health and Nutrition

- Number of births (per 1,000; 1988, 1990):¹
 - a) at or above 5.5 pounds 940 942
 - b) between 3.3 and 5.5 pounds 50 48
 - c) below 3.3 pounds 10 10
- Number of mothers (per 1,000; 1988, 1990) receiving first prenatal care during:²
 - a) first trimester of pregnancy 753 723
 - b) second trimester of pregnancy 186 206
 - c) third trimester of pregnancy or never 61 70
- Percentage of infants born in the state with one or more of the following health risks (1990):³ ▲
 - late (in third trimester) or no prenatal care
 - low maternal weight gain (less than 21 pounds)
 - three or more older siblings
 - mother smoked during pregnancy
 - mother drank alcohol during pregnancy
 - closely spaced birth (within 18 months of previous birth)
 - a) no risks — —
 - b) 1 or more risks — —
 - c) 2 or more risks — —
 - d) 3 or more risks — —

Goal 2: High School Dropouts

Percentage of all 16- to 19-year-olds¹ without a high school credential² (1980, 1990)

¹ Does not include those still in high school
² Includes traditional high school diploma and alternative credential

Source: Bureau of the Census, 1980 and 1990

Direct Measures of the Objectives: Preschool Programs

- Number of children with disabilities in preschool (per 1,000 3- to 5-year-olds; 1991, 1992)⁴ 28 30

Goal 2: High School Completion

Direct Measures of the Goal: High School Completion

- Percentage of all adults with a high school credential (1990):⁵
 - a) 19- to 20-year-olds 77% —
 - b) 23- to 24-year-olds 77% —

Direct Measures of the Objectives: School Dropouts

- Percentage of all 16- to 19-year-olds without a high school credential (1990)⁶ 14% —

Goal 3: Student Achievement and Citizenship

Direct Measures of the Goal: Student Achievement

- Percentage of all public school students who scored at the Proficient or Advanced level in mathematics, thus meeting the Goals Panel's performance standard (1990, 1992):⁷ ■

Grade 4	—	13%
Grade 8	16%	20% ^{ns}

- Percentage of all public school students who scored at the Proficient or Advanced level in reading, thus meeting the Goals Panel's performance standard (1990, 1992):⁸ ■

Grade 4	—	17%
---------	---	-----

Direct Measures of the Goal: Advanced Placement Participation and Performance

- Number of Advanced Placement examinations taken in the following subject areas (per 1,000 11th and 12th graders; 1991, 1993):⁹

English, mathematics, science, and history Number receiving grades of 3 or higher	101 65	111 71
Foreign languages Number receiving grades of 3 or higher	19 14	22 17
Fine arts Number receiving grades of 3 or higher	3 2	4 3

Additional Important Information: Participation in Challenging Courses

- Estimated percentage of public high school students taking the following courses (1989, 1990):¹⁰

Algebra I	92%	89%
Algebra II	44%	42%
Calculus	9%	9%
Biology	91%	89%
Chemistry	33%	33%
Physics	16%	15%

Goal 3: Mathematics Achievement

Percentage of all public school students who met the Goals Panel's performance standard¹ in mathematics (1990, 1992)

¹ The Goals Panel's performance standard is "mastery over challenging subject matter" as indicated by performance at the Proficient or Advanced levels on the National Assessment of Educational Progress (NAEP). These levels were established by the National Assessment Governing Board (NAGB) and reported by the National Center for Education Statistics (NCES) in recent NAEP publications. A more complete description of the performance standard can be found in Appendix B.

Goals
Report

Goal 1: Readiness for School

Direct Measures of the Goal: School Readiness

No direct measure of children's early development and learning during the kindergarten year is available yet.

Direct Measures of the Objectives: Children's Health and Nutrition

- Number of births (per 1,000; 1988, 1990):¹

a) at or above 5.5 pounds	923	926
b) between 3.3 and 5.5 pounds	63	60
c) below 3.3 pounds	14	14
- Number of mothers (per 1,000; 1988, 1990) receiving first prenatal care during:²

a) first trimester of pregnancy	701	724
b) second trimester of pregnancy	217	205
c) third trimester of pregnancy or never	82	71
- Percentage of infants born in the state with one or more of the following health risks (1990):³ ▲

— late (in third trimester) or no prenatal care		
— low maternal weight gain (less than 21 pounds)		
— three or more older siblings		
— mother smoked during pregnancy		
— mother drank alcohol during pregnancy		
— closely spaced birth (within 18 months of previous birth)		
a) no risks	—	54%
b) 1 or more risks	—	46%
c) 2 or more risks	—	15%
d) 3 or more risks	—	4%

Direct Measures of the Objectives: Preschool Programs

- Number of children with disabilities in preschool (per 1,000 3- to 5-year-olds; 1991, 1992)⁴

30	31
----	----

Goal 2: High School Completion

Direct Measures of the Goal: High School Completion

- Percentage of all adults with a high school credential (1990):⁵

a) 19- to 20-year-olds	79%	—
b) 23- to 24-year-olds	82%	—

Direct Measures of the Objectives: School Dropouts

- Percentage of all 16- to 19-year-olds without a high school credential (1990)⁶

Goal 3: Student Achievement and Citizenship

Direct Measures of the Goal: Student Achievement

- Percentage of all public school students who scored at the Proficient or Advanced level in mathematics, thus meeting the Goals Panel's performance standard (1990, 1992):⁷ ■

Grade 4	—	14%
Grade 8	15%	18% ^{ns}

- Percentage of all public school students who scored at the Proficient or Advanced level in reading, thus meeting the Goals Panel's performance standard (1990, 1992):⁸ ■

Grade 4	—	18%
---------	---	-----

Direct Measures of the Goal: Advanced Placement Participation and Performance

- Number of Advanced Placement examinations taken in the following subject areas (per 1,000 11th and 12th graders; 1991, 1993):⁹

English, mathematics, science, and history Number receiving grades of 3 or higher	118 61	129 66
Foreign languages Number receiving grades of 3 or higher	13 10	14 10
Fine arts Number receiving grades of 3 or higher	6 4	6 4

Additional Important Information: Participation in Challenging Courses

- Estimated percentage of public high school students taking the following courses (1989, 1991):¹⁰

Algebra I	78%	78%
Algebra II	42%	46%
Calculus	9%	7%
Biology	95+%	95+%
Chemistry	44%	47%
Physics	19%	21%

Goal 3: Mathematics Achievement

Percentage of all public school students who met the Goals Panel's performance standard¹ in mathematics (1990, 1992)

¹ The Goals Panel's performance standard is "mastery over challenging subject matter" as indicated by performance at the Proficient or Advanced levels on the National Assessment of Educational Progress (NAEP). These levels were established by the National Assessment Governing Board (NAGB) and reported by the National Center for Education Statistics (NCES) in recent NAEP publications. A more complete description of the performance standard can be found in Appendix B.

IDAHO

Measuring State Progress Toward the
Goals and Objectives**Goal 1: Children's Health Index**
Percentage of infants born in the state with
1 or more health risks¹ (1990)

¹ Includes late (in third trimester) or no prenatal care, low maternal weight gain (less than 21 pounds), three or more older siblings, mother smoked during pregnancy, mother drank alcohol during pregnancy, or closely spaced birth (within 18 months of previous birth)

Source: National Center for Health Statistics and Westat, Inc., 1993

Goal 2: High School Dropouts
Percentage of all 16- to 19-year-olds¹
without a high school credential²
(1980, 1990)

¹ Does not include those still in high school

² Includes traditional high school diploma and alternative credential

Source: Bureau of the Census,
1980 and 1990

Baseline
1993
Goals
Report

Goal 1: Readiness for School**Direct Measures of the Goal: School Readiness**

No direct measure of children's early development and learning during the kindergarten year is available yet.

Direct Measures of the Objectives: Children's Health and Nutrition

- Number of births (per 1,000; 1988, 1990):¹

a) at or above 5.5 pounds	949	943
b) between 3.3 and 5.5 pounds	44	48
c) below 3.3 pounds	8	8
- Number of mothers (per 1,000; 1988, 1990) receiving first prenatal care during:²

a) first trimester of pregnancy	748	742
b) second trimester of pregnancy	196	139
c) third trimester of pregnancy or never	56	59
- Percentage of infants born in the state with one or more of the following health risks (1990):³ ▲
 - late (in third trimester) or no prenatal care
 - low maternal weight gain (less than 21 pounds)
 - three or more older siblings
 - mother smoked during pregnancy
 - mother drank alcohol during pregnancy
 - closely spaced birth (within 18 months of previous birth)

a) no risks	—	51%
b) 1 or more risks	—	49%
c) 2 or more risks	—	16%
d) 3 or more risks	—	4%

Direct Measures of the Objectives: Preschool Programs

- Number of children with disabilities in preschool (per 1,000 3- to 5-year-olds; 1991, 1992)⁴

56	54
----	----

Goal 2: High School Completion**Direct Measures of the Goal: High School Completion**

- Percentage of all adults with a high school credential (1990):⁵

a) 19- to 20-year-olds	86%	—
b) 23- to 24-year-olds	86%	—

Direct Measures of the Objectives: School Dropouts

- Percentage of all 16- to 19-year-olds without a high school credential (1990)⁶

Goals
Report

Goal 3: Student Achievement and Citizenship

Direct Measures of the Goal: Student Achievement

- Percentage of all public school students who scored at the Proficient or Advanced level in mathematics, thus meeting the Goals Panel's performance standard (1990, 1992):⁷ ■

Grade 4	—	16%
Grade 8	23%	27% ^{ns}

- Percentage of all public school students who scored at the Proficient or Advanced level in reading, thus meeting the Goals Panel's performance standard (1992):⁸ ■

Grade 4	—	24%
---------	---	-----

Direct Measures of the Goal: Advanced Placement Participation and Performance

- Number of Advanced Placement examinations taken in the following subject areas (per 1,000 11th and 12th graders; 1991, 1993):⁹

English, mathematics, science, and history Number receiving grades of 3 or higher	39 25	42 29
Foreign languages Number receiving grades of 3 or higher	1 <1	1 1
Fine arts Number receiving grades of 3 or higher	<1 <1	1 <1

Additional Important Information: Participation in Challenging Courses

- Estimated percentage of public high school students taking the following courses (1989, 1991):¹⁰

Algebra I	95+%	74%
Algebra II	64%	66%
Calculus	6%	13%
Biology	80%	87%
Chemistry	26%	44%
Physics	15%	14%

Goal 3: Mathematics Achievement

Percentage of all public school students who met the Goals Panel's performance standard¹ in mathematics (1990, 1992)

¹ The Goals Panel's performance standard is "mastery over challenging subject matter" as indicated by performance at the Proficient or Advanced levels on the National Assessment of Educational Progress (NAEP). These levels were established by the National Assessment Governing Board (NAGB) and reported by the National Center for Education Statistics (NCES) in recent NAEP publications. A more complete description of the performance standard can be found in Appendix B.

Physics	19%	20%

Goal 3: Mathematics Achievement

Percentage of all public school students who met the Goals Panel's performance standard¹ in mathematics (1990, 1992)

¹ The Goals Panel's performance standard is "mastery over challenging subject matter" as indicated by performance at the Proficient or Advanced levels on the National Assessment of Educational Progress (NAEP). These levels were established by the National Assessment Governing Board (NAGB) and reported by the National Center for Education Statistics (NCES) in recent NAEP publications. A more complete description of the performance standard can be found in Appendix B.

Report

Goal 4: Science and Mathematics**Direct Measures of the Goal: International Student Achievement Comparisons**

- Percentage of public school 8th graders who scored at the Proficient or Advanced level in mathematics compared with 3 highest achieving nations (1991 and 1992):¹¹

Taiwan = 41% Korea = 37% Switzerland = 33% — 24%

Direct Measures of the Objectives: Strengthening Science and Mathematics Education

- Percentage of public school 8th graders (1990, 1992):¹²

a) whose teachers report that they do these activities in mathematics class:

- work in small groups at least once a week 39% 38% ns
- work with measuring instruments or geometric solids at least once a week — 5%

b) whose mathematics teachers heavily emphasize:

- Algebra and functions 45% 44% ns
- developing reasoning ability to solve unique problems 35% 45%
- communicating mathematics ideas 35% 34% ns

c) who have computers available in their mathematics classroom 14% 15% ns

d) who use calculators in mathematics class at least once a week 25% 39%

- Percentage of public school students enrolled in schools which had identified mathematics as a priority (1990, 1992):¹³
 - Grade 4 — 73%
 - Grade 8 44% 46% ns

Direct Measures of the Objectives: Teacher Certification

- Percentage of public high school science teachers who are certified to teach science (1991):¹⁴
 - Biology — 96%
 - Chemistry — 94%
 - Physics — 85%
 - Earth Science — 65%
- Percentage of public high school mathematics teachers who are certified to teach mathematics (1991):¹⁵ — 96%

Additional Important Information: Student Attitudes Toward Mathematics

- Percentage of public school students who reported positive attitudes toward mathematics (1990, 1992):¹⁶
 - Grade 4 — 76%
 - Grade 8 62% 66% ns

1993
Goals
Report

Goal 1: Children's Health Index
Percentage of infants born in the state with
1 or more health risks¹ (1990)

¹ Includes late (in third trimester) or no prenatal care, low maternal weight gain (less than 21 pounds), three or more older siblings, mother smoked during pregnancy, mother drank alcohol during pregnancy, or closely spaced birth (within 18 months of previous birth)

Source: National Center for Health Statistics and Westat, Inc., 1993

Goal 2: High School Dropouts
Percentage of all 16- to 19-year-olds¹
without a high school credential²
(1980, 1990)

¹ Does not include those still in high school
² Includes traditional high school diploma and alternative credential

Source: Bureau of the Census, 1980 and 1990

Goal 1: Readiness for School

Direct Measures of the Goal: School Readiness

No direct measure of children's early development and learning during the kindergarten year is available yet.

Direct Measures of the Objectives: Children's Health and Nutrition

- Number of births (per 1,000; 1988, 1990):¹

a) at or above 5.5 pounds	946	946
b) between 3.3 and 5.5 pounds	46	45
c) below 3.3 pounds	8	9
- Number of mothers (per 1,000; 1988, 1990) receiving first prenatal care during:²

a) first trimester of pregnancy	854	848
b) second trimester of pregnancy	121	128
c) third trimester of pregnancy or never	25	23
- Percentage of infants born in the state with one or more of the following health risks (1990):³ ▲

– late (in third trimester) or no prenatal care		
– low maternal weight gain (less than 21 pounds)		
– three or more older siblings		
– mother smoked during pregnancy		
– mother drank alcohol during pregnancy		
– closely spaced birth (within 18 months of previous birth)		
a) no risks	—	53%
b) 1 or more risks	—	47%
c) 2 or more risks	—	15%
d) 3 or more risks	—	3%

Direct Measures of the Objectives: Preschool Programs

- Number of children with disabilities in preschool (per 1,000 3- to 5-year-olds; 1991, 1992)⁴

45	46
----	----

Goal 2: High School Completion

Direct Measures of the Goal: High School Completion

Quantitative:	Level 5 (highest)	—	—
	Level 4	—	—
	Level 3	—	—
	Level 2	—	—
	Level 1 (lowest)	—	—

Direct Measures of the Goal: Citizenship

- Percentage of all U.S. citizens (1988, 1992).¹⁸

a) registered to vote	82%	86%
b) voting	67%	75%

Goal 6: Safe, Disciplined, and Drug-free Schools

Direct Measures of the Goal: Drug-free Students and Schools

- Percentage of all high school students who reported (1990, 1991).¹⁹

a) Using the following at least once during the past 30 days:		
— marijuana	—	—
— cocaine	—	—
b) Having five or more drinks in a row during the past 30 days	—	—

MARYLAND

Measuring State Progress Toward the Goals and Objectives

Baseline
1993
Goals
Report

Goal 1: Children's Health Index

Percentage of infants born in the state with 1 or more health risks¹ (1990)

¹ Includes late (in third trimester) or no prenatal care, low maternal weight gain (less than 21 pounds), three or more older siblings, mother smoked during pregnancy, mother drank alcohol during pregnancy, or closely spaced birth (within 18 months of previous birth)

Source: National Center for Health Statistics and Westat, Inc., 1993

Goal 2: High School Dropouts

Percentage of all 16- to 19-year-olds¹ without a high school credential² (1980, 1990)

¹ Does not include those still in high school
² Includes traditional high school diploma and alternative credential

Source: Bureau of the Census, 1980 and 1990

Goal 1: Readiness for School

Direct Measures of the Goal: School Readiness

No direct measure of children's early development and learning during the kindergarten year is available yet.

Direct Measures of the Objectives: Children's Health and Nutrition

- Number of births (per 1,000; 1988, 1990):¹

a) at or above 5.5 pounds	919	922
b) between 3.3 and 5.5 pounds	63	62
c) below 3.3 pounds	18	16
- Number of mothers (per 1,000; 1988, 1990) receiving first prenatal care during:²

a) first trimester of pregnancy	812	835
b) second trimester of pregnancy	146	127
c) third trimester of pregnancy or never	42	39
- Percentage of infants born in the state with one or more of the following health risks (1990):³ ▲

– late (in third trimester) or no prenatal care		
– low maternal weight gain (less than 21 pounds)		
– three or more older siblings		
– mother smoked during pregnancy		
– mother drank alcohol during pregnancy		
– closely spaced birth (within 18 months of previous birth)		
a) no risks	—	61%
b) 1 or more risks	—	39%
c) 2 or more risks	—	11%
d) 3 or more risks	—	3%

Direct Measures of the Objectives: Preschool Programs

- Number of children with disabilities in preschool (per 1,000 3- to 5-year-olds; 1991, 1992)⁴

34	36
----	----

Goal 2: High School Completion

Direct Measures of the Goal: High School Completion

- Percentage of all adults with a high school credential (1990):⁵

a) 19- to 20-year-olds	86%	—
b) 23- to 24-year-olds	87%	—

Direct Measures of the Objectives: School Dropouts

- Percentage of all 16- to 19-year-olds without a high school credential (1990)⁶

Report

Goal 3: Student Achievement and Citizenship

Direct Measures of the Goal: Student Achievement

- Percentage of all public school students who scored at the Proficient or Advanced level in mathematics, thus meeting the Goals Panel's performance standard (1990, 1992):⁷ ■

– Grade 4	—	19%
– Grade 8	20%	24% ^{ns}

- Percentage of all public school students who scored at the Proficient or Advanced level in reading, thus meeting the Goals Panel's performance standard (1992):⁸ ■

– Grade 4	—	21%
-----------	---	-----

Direct Measures of the Goal: Advanced Placement Participation and Performance

- Number of Advanced Placement examinations taken in the following subject areas (per 1,000 11th and 12th graders; 1991, 1993):⁹

– English, mathematics, science, and history Number receiving grades of 3 or higher	110 76	127 88
– Foreign languages Number receiving grades of 3 or higher	11 8	11 8
– Fine arts Number receiving grades of 3 or higher	2 2	3 2

Additional Important Information: Participation in Challenging Courses

- Estimated percentage of public high school students taking the following courses (1989):¹⁰

– Algebra I	94%	—
– Algebra II	51%	—
– Calculus	13%	—
– Biology	95+%	—
– Chemistry	61%	—
– Physics	27%	—

Goal 3: Mathematics Achievement

Percentage of all public school students who met the Goals Panel's performance standard¹ in mathematics (1990, 1992)

¹ The Goals Panel's performance standard is "mastery over challenging subject matter" as indicated by performance at the Proficient or Advanced levels on the National Assessment of Educational Progress (NAEP). These levels were established by the National Assessment Governing Board (NAGB) and reported by the National Center for Education Statistics (NCES) in recent NAEP publications. A more complete description of the performance standard can be found in Appendix B.

Goal 4: Science and Mathematics

Direct Measures of the Goal: International Student Achievement Comparisons

- Percentage of public school 8th graders who scored at the Proficient or Advanced level in mathematics compared with 3 highest achieving nations (1991 and 1992):¹¹

Taiwan = 41% Korea = 37% Switzerland = 33% — 24%

Direct Measures of the Objectives: Strengthening Science and Mathematics Education

- Percentage of public school 8th graders (1990, 1992):¹²

a) whose teachers report that they do these activities in mathematics class:

- work in small groups at least once a week: 56% 57% ns
- work with measuring instruments or geometric solids at least once a week: — 6%

b) whose mathematics teachers heavily emphasize:

- Algebra and functions: 51% 51% ns
- developing reasoning ability to solve unique problems: 53% 51% ns
- communicating mathematics ideas: 48% 46% ns

c) who have computers available in their mathematics classroom: 16% 19%

d) who use calculators in mathematics class at least once a week: 37% 61%

- Percentage of public school students enrolled in schools which had identified mathematics as a priority (1990, 1992):¹³
 - Grade 4: — 92%
 - Grade 8: 78% 85% ns

Direct Measures of the Objectives: Teacher Certification

- Percentage of public high school science teachers who are certified to teach science (1991):¹⁴ ●

- Biology: — —
- Chemistry: — —
- Physics: — —
- Earth Science: — —

- Percentage of public high school mathematics teachers who are certified to teach mathematics (1991):¹⁵ ●

— —

Additional Important Information: Student Attitudes Toward Mathematics

- Percentage of public school students who reported positive attitudes toward mathematics (1990, 1992):¹⁶

- Grade 4: — 71%
- Grade 8: 61% 60% ns

Goal 4: Science and Mathematics
Direct Measures of the Goal: International Student Achievement Comparisons

- Percentage of public school 8th graders who scored at the Proficient or Advanced level in mathematics compared with 3 highest achieving nations (1991 and 1992).¹¹

Taiwan = 41%	Korea = 37%	Switzerland = 33%	—	23%
--------------	-------------	-------------------	---	-----

Direct Measures of the Objectives: Strengthening Science and Mathematics Education

- Percentage of public school 8th graders (1990, 1992).¹²

a) whose teachers report that they do these activities in mathematics class:

- | | | |
|--|-----|-----|
| — work in small groups at least once a week | 44% | 56% |
| — work with measuring instruments or geometric solids at least once a week | — | 16% |

b) whose mathematics teachers heavily emphasize:

- | | | |
|---|-----|--------|
| — Algebra and functions | 47% | 47% |
| — developing reasoning ability to solve unique problems | 43% | 52% ns |
| — communicating mathematics ideas | 35% | 44% ns |

c) who have computers available in their mathematics classroom

20%	13% ns
-----	--------

d) who use calculators in mathematics class at least once a week

40%	76%
-----	-----

- Percentage of public school students enrolled in schools which had identified mathematics as a priority (1990, 1992).¹³

- | | | |
|-----------|-----|--------|
| — Grade 4 | — | 83% |
| — Grade 8 | 67% | 78% ns |

Direct Measures of the Objectives: Teacher Certification

- Percentage of public high school science teachers who are certified to teach science (1991).¹⁴ ●

- | | | |
|-----------------|---|---|
| — Biology | — | — |
| — Chemistry | — | — |
| — Physics | — | — |
| — Earth Science | — | — |

- Percentage of public high school mathematics teachers who are certified to teach mathematics (1991).¹⁵ ●

—	—
---	---

Additional Important Information: Student Attitudes Toward Mathematics

- Percentage of public school students who reported positive attitudes toward mathematics (1990, 1992).¹⁶

- | | | |
|-----------|-----|--------|
| — Grade 4 | — | 72% |
| — Grade 8 | 61% | 60% ns |

MINNESOTA

Measuring State Progress Toward the Goals and Objectives

Goal 1: Children's Health IndexPercentage of infants born in the state with 1 or more health risks¹ (1990)

¹ Includes late (in third trimester) or no prenatal care, low maternal weight gain (less than 21 pounds), three or more older siblings, mother smoked during pregnancy, mother drank alcohol during pregnancy, or closely spaced birth (within 18 months of previous birth)

Source: National Center for Health Statistics and Westat, Inc., 1993

Goal 2: High School DropoutsPercentage of all 16- to 19-year-olds¹ without a high school credential² (1980, 1990)

¹ Does not include those still in high school
² Includes traditional high school diploma and alternative credential

Source: Bureau of the Census, 1980 and 1990

Baseline
1993
Goals
Report

Goal 1: Readiness for School**Direct Measures of the Goal: School Readiness**

No direct measure of children's early development and learning during the kindergarten year is available yet.

Direct Measures of the Objectives: Children's Health and Nutrition

- Number of births (per 1,000; 1988, 1990):¹
 - a) at or above 5.5 pounds 950 949
 - b) between 3.3 and 5.5 pounds 41 41
 - c) below 3.3 pounds 9 9
- Number of mothers (per 1,000; 1988, 1990) receiving first prenatal care during:²
 - a) first trimester of pregnancy 798 812
 - b) second trimester of pregnancy 158 152
 - c) third trimester of pregnancy or never 44 36
- Percentage of infants born in the state with one or more of the following health risks (1990):³ ▲
 - late (in third trimester) or no prenatal care
 - low maternal weight gain (less than 21 pounds)
 - three or more older siblings
 - mother smoked during pregnancy
 - mother drank alcohol during pregnancy
 - closely spaced birth (within 18 months of previous birth)
 - a) no risks — 62%
 - b) 1 or more risks — 38%
 - c) 2 or more risks — 12%
 - d) 3 or more risks — 3%

Direct Measures of the Objectives: Preschool Programs

- Number of children with disabilities in preschool (per 1,000 3- to 5-year-olds; 1991, 1992)⁴ 42 44

Goal 2: High School Completion**Direct Measures of the Goal: High School Completion**

- Percentage of all adults with a high school credential (1990):⁵
 - a) 19- to 20-year-olds 92% —
 - b) 23- to 24-year-olds 93% —

Direct Measures of the Objectives: School Dropouts

- Percentage of all 16- to 19-year-olds without a high school credential (1990)⁶ 6% —

Goals
Report

Goal 3: Student Achievement and Citizenship

Direct Measures of the Goal: Student Achievement

- Percentage of all public school students who scored at the Proficient or Advanced level in mathematics, thus meeting the Goals Panel's performance standard (1990, 1992):⁷ ■

– Grade 4	—	27%
– Grade 8	29%	37%
- Percentage of all public school students who scored at the Proficient or Advanced level in reading, thus meeting the Goals Panel's performance standard (1992):⁸ ■

– Grade 4	—	28%
-----------	---	-----

Direct Measures of the Goal: Advanced Placement Participation and Performance

- Number of Advanced Placement examinations taken in the following subject areas (per 1,000 11th and 12th graders; 1991, 1993):⁹

– English, mathematics, science, and history	28	37
Number receiving grades of 3 or higher	18	25
– Foreign languages	2	2
Number receiving grades of 3 or higher	1	1
– Fine arts	<1	<1
Number receiving grades of 3 or higher	<1	<1

Additional Important Information: Participation in Challenging Courses

- Estimated percentage of public high school students taking the following courses (1989, 1991):¹⁰

– Algebra I	90%	95+%
– Algebra II	55%	62%
– Calculus	12%	13%
– Biology	95+%	95+%
– Chemistry	44%	52%
– Physics	23%	25%

Goal 3: Mathematics Achievement

Percentage of all public school students who met the Goals Panel's performance standard¹ in mathematics (1990, 1992)

¹ The Goals Panel's performance standard is "mastery over challenging subject matter" as indicated by performance at the Proficient or Advanced levels on the National Assessment of Educational Progress (NAEP). These levels were established by the National Assessment Governing Board (NAGB) and reported by the National Center for Education Statistics (NCES) in recent NAEP publications. A more complete description of the performance standard can be found in Appendix B.

Goals
Report

Goal 3: Student Achievement and Citizenship

Direct Measures of the Goal: Student Achievement

- Percentage of all public school students who scored at the Proficient or Advanced level in mathematics, thus meeting the Goals Panel's performance standard (1990, 1992):⁷ ■

— Grade 4	—	19%
— Grade 8	—	24%

- Percentage of all public school students who scored at the Proficient or Advanced level in reading, thus meeting the Goals Panel's performance standard (1992):⁸ ■

— Grade 4	—	26%
-----------	---	-----

Direct Measures of the Goal: Advanced Placement Participation and Performance

- Number of Advanced Placement examinations taken in the following subject areas (per 1,000 11th and 12th graders; 1991, 1993):⁹

— English, mathematics, science, and history Number receiving grades of 3 or higher	28 21	37 27
— Foreign languages Number receiving grades of 3 or higher	2 1	2 2
— Fine arts Number receiving grades of 3 or higher	<1 <1	1 <1

Additional Important Information: Participation in Challenging Courses

- Estimated percentage of public high school students taking the following courses (1989, 1991):¹⁰

— Algebra I	95%	95+%
— Algebra II	58%	63%
— Calculus	8%	11%
— Biology	86%	90%
— Chemistry	41%	46%
— Physics	16%	18%

Goal 3: Mathematics Achievement

Percentage of all public school students who met the Goals Panel's performance standard¹ in mathematics (1990, 1992)

¹ The Goals Panel's performance standard is "mastery over challenging subject matter" as indicated by performance at the Proficient or Advanced levels on the National Assessment of Educational Progress (NAEP). These levels were established by the National Assessment Governing Board (NAGB) and reported by the National Center for Education Statistics (NCES) in recent NAEP publications. A more complete description of the performance standard can be found in Appendix B.

Goal 4: Science and Mathematics**Direct Measures of the Goal: International Student Achievement Comparisons**

- Percentage of public school 8th graders who scored at the Proficient or Advanced level in mathematics compared with 3 highest achieving nations (1991 and 1992).¹¹

Taiwan = 41% Korea = 37% Switzerland = 33% — 24%

Direct Measures of the Objectives: Strengthening Science and Mathematics Education

- Percentage of public school 8th graders (1990, 1992).¹²
 - a) whose teachers report that they do these activities in mathematics class:
 - work in small groups at least once a week — 40%
 - work with measuring instruments or geometric solids at least once a week — 8%
 - b) whose mathematics teachers heavily emphasize:
 - Algebra and functions — 43%
 - developing reasoning ability to solve unique problems — 42%
 - communicating mathematics ideas — 34%
 - c) who have computers available in their mathematics classroom — 19%
 - d) who use calculators in mathematics class at least once a week — 78%
- Percentage of public school students enrolled in schools which had identified mathematics as a priority (1990, 1992).¹³
 - Grade 4 — 56%
 - Grade 8 — 44%

Direct Measures of the Objectives: Teacher Certification

- Percentage of public high school science teachers who are certified to teach science (1991).¹⁴ ●
 - Biology — 96%
 - Chemistry — 93%
 - Physics — 74%
 - Earth Science — 65%
- Percentage of public high school mathematics teachers who are certified to teach mathematics (1991).¹⁵ ● — 99%

Additional Important Information: Student Attitudes Toward Mathematics

- Percentage of public school students who reported positive attitudes toward mathematics (1990, 1992).¹⁶
 - Grade 4 — 74%
 - Grade 8 — 62%

1993
Goals
Report

Goal 1: Readiness for School**Direct Measures of the Goal: School Readiness**

No direct measure of children's early development and learning during the kindergarten year is available yet.

Direct Measures of the Objectives: Children's Health and Nutrition

- Number of births (per 1,000; 1988, 1990):¹

a) at or above 5.5 pounds	925	928
b) between 3.3 and 5.5 pounds	63	61
c) below 3.3 pounds	12	11
- Number of mothers (per 1,000; 1988, 1990) receiving first prenatal care during:²

a) first trimester of pregnancy	720	725
b) second trimester of pregnancy	186	194
c) third trimester of pregnancy or never	94	81
- Percentage of infants born in the state with one or more of the following health risks (1990):³ ▲

– late (in third trimester) or no prenatal care		
– low maternal weight gain (less than 21 pounds)		
– three or more older siblings		
– mother smoked during pregnancy		
– mother drank alcohol during pregnancy		
– closely spaced birth (within 18 months of previous birth)		
a) no risks	—	52%
b) 1 or more risks	—	48%
c) 2 or more risks	—	16%
d) 3 or more risks	—	4%

Direct Measures of the Objectives: Preschool Programs

- Number of children with disabilities in preschool (per 1,000 3- to 5-year-olds; 1991, 1992)⁴

	26	31
--	----	----

Goal 2: High School Completion**Direct Measures of the Goal: High School Completion**

- Percentage of all adults with a high school credential (1990):⁵

a) 19- to 20-year-olds	78%	—
b) 23- to 24-year-olds	80%	—

Direct Measures of the Objectives: School Dropouts

- Percentage of all 16- to 19-year-olds without a high school credential (1990)⁶

	15%	—
--	-----	---

Report

Goal 3: Student Achievement and Citizenship

Direct Measures of the Goal: Student Achievement

- Percentage of all public school students who scored at the Proficient or Advanced level in mathematics, thus meeting the Goals Panel's performance standard (1990, 1992):⁷ ■
 - Grade 4 — —
 - Grade 8 — —
- Percentage of all public school students who scored at the Proficient or Advanced level in reading, thus meeting the Goals Panel's performance standard (1992):⁸ ■
 - Grade 4 — —

Direct Measures of the Goal: Advanced Placement Participation and Performance

- Number of Advanced Placement examinations taken in the following subject areas (per 1,000 11th and 12th graders; 1991, 1993):⁹

– English, mathematics, science, and history	62	65
Number receiving grades of 3 or higher	29	34
– Foreign languages	4	5
Number receiving grades of 3 or higher	3	3
– Fine arts	1	1
Number receiving grades of 3 or higher	<1	1

Additional Important Information: Participation in Challenging Courses

- Estimated percentage of public high school students taking the following courses (1989, 1991):¹⁰

– Algebra I	90%	80%
– Algebra II	32%	43%
– Calculus	5%	5%
– Biology	65%	95+%
– Chemistry	33%	43%
– Physics	13%	18%

Goals
Report

Goal 1: Readiness for School

Direct Measures of the Goal: School Readiness

No direct measure of children's early development and learning during the kindergarten year is available yet

Direct Measures of the Objectives: Children's Health and Nutrition

- Number of births (per 1,000; 1988, 1990)¹
 - a) at or above 5.5 pounds 952 951
 - b) between 3.3 and 5.5 pounds 40 40
 - c) below 3.3 pounds 8 9
- Number of mothers (per 1,000; 1988, 1990) receiving first prenatal care during:²
 - a) first trimester of pregnancy 841 858
 - b) second trimester of pregnancy 129 118
 - c) third trimester of pregnancy or never 30 25
- Percentage of infants born in the state with one or more of the following health risks (1990):³ ▲
 - late (in third trimester) or no prenatal care
 - low maternal weight gain (less than 21 pounds)
 - three or more older siblings
 - mother smoked during pregnancy
 - mother drank alcohol during pregnancy
 - closely spaced birth (within 18 months of previous birth)
 - a) no risks — 58%
 - b) 1 or more risks — 42%
 - c) 2 or more risks — 12%
 - d) 3 or more risks — 3%

Direct Measures of the Objectives: Preschool Programs

- Number of children with disabilities in preschool (per 1,000 3- to 5-year-olds; 1991, 1992)⁴ 29 31

Goal 2: High School Completion

Direct Measures of the Goal: High School Completion

- Percentage of all adults with a high school credential (1990):⁵
 - a) 19- to 20-year-olds 87% —
 - b) 23- to 24-year-olds 88% —

Direct Measures of the Objectives: School Dropouts

Goal 3: Mathematics Achievement

Percentage of all public school students who met the Goals Panel's performance standard¹ in mathematics (1990, 1992)

¹ The Goals Panel's performance standard is "mastery over challenging subject matter" as indicated by performance at the Proficient or Advanced levels on the National Assessment of Educational Progress (NAEP). These levels were established by the National Assessment Governing Board (NAGB) and reported by the National Center for Education Statistics (NCES) in recent NAEP publications. A more complete description of the performance standard can be found in Appendix B.

Goal 4: Science and Mathematics

Direct Measures of the Goal: International Student Achievement Comparisons

- Percentage of public school 8th graders who scored at the Proficient or Advanced level in mathematics compared with 3 highest achieving nations (1991 and 1992).¹¹

Taiwan = 41% Korea = 37% Switzerland = 33% — 15%

Direct Measures of the Objectives: Strengthening Science and Mathematics Education

- Percentage of public school 8th graders (1990, 1992).¹²

a) whose teachers report that they do these activities in mathematics class:

- work in small groups at least once a week 45% 50% ^{ns}
- work with measuring instruments or geometric solids at least once a week — 5%

b) whose mathematics teachers heavily emphasize:

- Algebra and functions 44% 44%
- developing reasoning ability to solve unique problems 46% 48% ^{ns}
- communicating mathematics ideas 44% 42% ^{ns}

c) who have computers available in their mathematics classroom

21% 13% ^{ns}

d) who use calculators in mathematics class at least once a week

30% 42%

- Percentage of public school students enrolled in schools which had identified mathematics as a priority (1990, 1992).¹³
- Grade 4 — 80%
- Grade 8 71% 67% ^{ns}

Direct Measures of the Objectives: Teacher Certification

- Percentage of public high school science teachers who are certified to teach science (1991).¹⁴ ●

- Biology — 97%
- Chemistry — 100%
- Physics — 92%
- Earth Science — 92%

- Percentage of public high school mathematics teachers who are certified to teach mathematics (1991).¹⁵ ●

— 93%

Additional Important Information: Student Attitudes Toward Mathematics

- Percentage of public school students who reported positive attitudes toward mathematics (1990, 1992).¹⁶

- Grade 4 — 73%
- Grade 8 65% 64% ^{ns}

— Data not available.

Goal 5: Adult Literacy and Lifelong Learning

Direct Measures of the Goal: Adult Literacy

- Percentage of adults aged 16 and older who scored at the following literacy levels (1992):¹⁷

Prose:	Level 5 (highest)	—	3%
	Level 4	—	16%
	Level 3	—	35%
	Level 2	—	28%
	Level 1 (lowest)	—	18%
Document:	Level 5 (highest)	—	2%
	Level 4	—	15%
	Level 3	—	32%
	Level 2	—	28%
	Level 1 (lowest)	—	22%
Quantitative:	Level 5 (highest)	—	4%
	Level 4	—	17%
	Level 3	—	33%
	Level 2	—	25%
	Level 1 (lowest)	—	21%

Direct Measures of the Goal: Citizenship

- Percentage of all U.S. citizens (1988, 1992):¹⁸
 - a) registered to vote 63% 66%
 - b) voting 56% 61%

Goal 6: Safe, Disciplined, and Drug-free Schools

Direct Measures of the Goal: Drug-free Students and Schools

- Percentage of all high school students who reported (1990, 1991):¹⁹
 - a) Using the following at least once during the past 30 days:
 - marijuana —
 - cocaine —
 - b) Having five or more drinks in a row during the past 30 days —

Goal 5: Adult Literacy

Percentage of adults aged 16 and older scoring at five literacy levels¹ (1992)

¹ Test results are reported on scales of 0 to 500 points and five levels, with Level 5 being most proficient and Level 1 being least proficient.

RHODE ISLAND

Measuring State Progress Toward the Goals and Objectives

Goal 1: Children's Health Index

Percentage of infants born in the state with 1 or more health risks¹ (1990)

¹ Includes late (in third trimester) or no prenatal care, low maternal weight gain (less than 21 pounds), three or more older siblings, mother smoked during pregnancy, mother drank alcohol during pregnancy, or closely spaced birth (within 18 months of previous birth)

Source: National Center for Health Statistics and Westat, Inc., 1993

Goal 2: High School Dropouts

Percentage of all 16- to 19-year-olds¹ without a high school credential² (1980, 1990)

¹ Does not include those still in high school

² Includes traditional high school diploma and alternative credential

Source: Bureau of the Census, 1980 and 1990

Baseline
1993
Goals
Report

Goal 1: Readiness for School

Direct Measures of the Goal: School Readiness

No direct measure of children's early development and learning during the kindergarten year is available yet.

Direct Measures of the Objectives: Children's Health and Nutrition

- Number of births (per 1,000; 1988, 1990):¹

a) at or above 5.5 pounds	940	938
b) between 3.3 and 5.5 pounds	50	51
c) below 3.3 pounds	10	11
- Number of mothers (per 1,000; 1988, 1990) receiving first prenatal care during:²

a) first trimester of pregnancy	840	868
b) second trimester of pregnancy	130	113
c) third trimester of pregnancy or never	30	20
- Percentage of infants born in the state with one or more of the following health risks (1990):³ ▲

— late (in third trimester) or no prenatal care		
— low maternal weight gain (less than 21 pounds)		
— three or more older siblings		
— mother smoked during pregnancy		
— mother drank alcohol during pregnancy		
— closely spaced birth (within 18 months of previous birth)		
a) no risks	—	56%
b) 1 or more risks	—	44%
c) 2 or more risks	—	13%
d) 3 or more risks	—	3%

Direct Measures of the Objectives: Preschool Programs

- Number of children with disabilities in preschool (per 1,000 3- to 5-year-olds; 1991, 1992)⁴

42	45
----	----

Goal 2: High School Completion

Direct Measures of the Goal: High School Completion

- Percentage of all adults with a high school credential (1990):⁵

a) 19- to 20-year-olds	87%	—
b) 23- to 24-year-olds	85%	—

Direct Measures of the Objectives: School Dropouts

- Percentage of all 16- to 19-year-olds without a high school credential (1990)⁶

11%	—

Report

Goal 3: Student Achievement and Citizenship

Direct Measures of the Goal: Student Achievement

- Percentage of all public school students who scored at the Proficient or Advanced level in mathematics, thus meeting the Goals Panel's performance standard (1990, 1992):⁷ ■

- Grade 4	—	14%
- Grade 8	18%	20% ^{ns}

- Percentage of all public school students who scored at the Proficient or Advanced level in reading, thus meeting the Goals Panel's performance standard (1992):⁸ ■

- Grade 4	—	24%
-----------	---	-----

Direct Measures of the Goal: Advanced Placement Participation and Performance

- Number of Advanced Placement examinations taken in the following subject areas (per 1,000 11th and 12th graders; 1991, 1993):⁹

- English, mathematics, science, and history Number receiving grades of 3 or higher	73 50	74 52
- Foreign languages Number receiving grades of 3 or higher	5 4	7 5
- Fine arts Number receiving grades of 3 or higher	1 1	2 2

Additional Important Information: Participation in Challenging Courses

- Estimated percentage of public high school students taking the following courses (1989, 1991):¹⁰

- Algebra I	—	—
- Algebra II	—	—
- Calculus	—	—
- Biology	—	—
- Chemistry	—	—
- Physics	—	—

Goal 3: Mathematics Achievement

Percentage of all public school students who met the Goals Panel's performance standard¹ in mathematics (1990, 1992)

¹ The Goals Panel's performance standard is "mastery over challenging subject matter" as indicated by performance at the Proficient or Advanced levels on the National Assessment of Educational Progress (NAEP). These levels were established by the National Assessment Governing Board (NAGB) and reported by the National Center for Education Statistics (NCES) in recent NAEP publications. A more complete description of the performance standard can be found in Appendix B.

Goal 4: Science and Mathematics

Direct Measures of the Goal: International Student Achievement Comparisons

- Percentage of public school 8th graders who scored at the Proficient or Advanced level in mathematics compared with 3 highest achieving nations (1991 and 1992).¹¹

Taiwan = 41% Korea = 37% Switzerland = 33% — 20%

Direct Measures of the Objectives: Strengthening Science and Mathematics Education

- Percentage of public school 8th graders (1990, 1992).¹²

a) whose teachers report that they do these activities in mathematics class:

- work in small groups at least once a week 27% 38%
- work with measuring instruments or geometric solids at least once a week — 9%

b) whose mathematics teachers heavily emphasize:

- Algebra and functions 43% 45%^{ns}
- developing reasoning ability to solve unique problems 43% 53%
- communicating mathematics ideas 37% 46%

c) who have computers available in their mathematics classroom

16% 15%^{ns}

d) who use calculators in mathematics class at least once a week

23% 47%

- Percentage of public school students enrolled in schools which had identified mathematics as a priority (1990, 1992).¹³

- Grade 4 — 64%
- Grade 8 47% 73%

Direct Measures of the Objectives: Teacher Certification

- Percentage of public high school science teachers who are certified to teach science (1991).¹⁴ ●

- Biology — —
- Chemistry — —
- Physics — —
- Earth Science — —

- Percentage of public high school mathematics teachers who are certified to teach mathematics (1991).¹⁵ ●

— —

Additional Important Information: Student Attitudes Toward Mathematics

- Percentage of public school students who reported positive attitudes toward mathematics (1990, 1992).¹⁶

- Grade 4 — 72%
- Grade 8 57% 60%^{ns}

Direct Measures of the Objectives: Strengthening Science and Mathematics Education

- Percentage of public school 8th graders (1990, 1992):¹²
 - a) whose teachers report that they do these activities in mathematics class:
 - work in small groups at least once a week
 - work with measuring instruments or geometric solids at least once a week
 - b) whose mathematics teachers heavily emphasize:
 - Algebra and functions
 - developing reasoning ability to solve unique problems
 - communicating mathematics ideas
 - c) who have computers available in their mathematics classroom
 - d) who use calculators in mathematics class at least once a week
- Percentage of public school students enrolled in schools which had identified mathematics as a priority (1990, 1992):¹³
 - Grade 4
 - Grade 8

Direct Measures of the Objectives: Teacher Certification

- Percentage of public high school science teachers who are certified to teach science (1991):¹⁴ ●
 - Biology
 - Chemistry
 - Physics
 - Earth Science
- Percentage of public high school mathematics teachers who are certified to teach mathematics (1991):¹⁵ ●

**Additional Important Information:
Student Attitudes Toward Mathematics**

- Percentage of public school students who reported positive attitudes toward mathematics (1990, 1992):¹⁶
 - Grade 4
 - Grade 8

TENNESSEE

Measuring State Progress Toward the Goals and Objectives

Goal 1: Children's Health Index

Percentage of infants born in the state with 1 or more health risks¹ (1990)

¹ Includes late (in third trimester) or no prenatal care, low maternal weight gain (less than 21 pounds), three or more older siblings, mother smoked during pregnancy, mother drank alcohol during pregnancy, or closely spaced birth (within 18 months of previous birth)

Source: National Center for Health Statistics and Westat, Inc., 1993

Goal 2: High School Dropouts

Percentage of all 16- to 19-year-olds¹ without a high school credential² (1980, 1990)

¹ Does not include those still in high school
² Includes traditional high school diploma and alternative credential

Source: Bureau of the Census, 1980 and 1990

Baseline
1993
Goals
Report

Goal 1: Readiness for School

Direct Measures of the Goal: School Readiness

No direct measure of children's early development and learning during the kindergarten year is available yet.

Direct Measures of the Objectives: Children's Health and Nutrition

- Number of births (per 1,000; 1988, 1990):¹

a) at or above 5.5 pounds	921	918
b) between 3.3 and 5.5 pounds	65	67
c) below 3.3 pounds	14	15
- Number of mothers (per 1,000; 1988, 1990) receiving first prenatal care during:²

a) first trimester of pregnancy	755	776
b) second trimester of pregnancy	193	176
c) third trimester of pregnancy or never	52	47
- Percentage of infants born in the state with one or more of the following health risks (1990):³ ▲

– late (in third trimester) or no prenatal care	—	55%
– low maternal weight gain (less than 21 pounds)	—	45%
– three or more older siblings	—	14%
– mother smoked during pregnancy	—	3%
– mother drank alcohol during pregnancy	—	—
– closely spaced birth (within 18 months of previous birth)	—	—
a) no risks	—	55%
b) 1 or more risks	—	45%
c) 2 or more risks	—	14%
d) 3 or more risks	—	3%

Direct Measures of the Objectives: Preschool Programs

- Number of children with disabilities in preschool (per 1,000 3- to 5-year-olds; 1991, 1992):⁴

37	43
----	----

Goal 2: High School Completion

Direct Measures of the Goal: High School Completion

- Percentage of all adults with a high school credential (1990):⁵

a) 19- to 20-year-olds	81%	—
b) 23- to 24-year-olds	81%	—

Direct Measures of the Objectives: School Dropouts

- Percentage of all 16- to 19-year-olds without a high school credential (1990):⁶

Goal 3: Student Achievement and Citizenship

Direct Measures of the Goal: Student Achievement

- Percentage of all public school students who scored at the Proficient or Advanced level in mathematics, thus meeting the Goals Panel's performance standard (1990, 1992):² ■

Grade 4	---	10%
Grade 8	---	15%

- Percentage of all public school students who scored at the Proficient or Advanced level in reading, thus meeting the Goals Panel's performance standard (1992):² ■

Grade 4	---	20%
---------	-----	-----

Direct Measures of the Goal: Advanced Placement Participation and Performance

- Number of Advanced Placement examinations taken in the following subject areas (per 1,000 11th and 12th graders; 1991, 1993):³

English, mathematics, science, and history	60	68
Number receiving grades of 3 or higher	37	44
Foreign languages	2	2
Number receiving grades of 3 or higher	1	1
Fine arts	2	2
Number receiving grades of 3 or higher	2	2

Additional Important Information: Participation in Challenging Courses

- Estimated percentage of public high school students taking the following courses (1989, 1991):¹⁰

Algebra I	79%	81%
Algebra II	54%	57%
Calculus	4%	5%
Biology	88%	95+%
Chemistry	42%	46%
Physics	11%	13%

Goal 3: Mathematics Achievement

Percentage of all public school students who met the Goals Panel's performance standard¹ in mathematics (1990, 1992)

¹ The Goals Panel's performance standard is "mastery over challenging subject matter" as indicated by performance at the Proficient or Advanced levels on the National Assessment of Educational Progress (NAEP). These levels were established by the National Assessment Governing Board (NAGB) and reported by the National Center for Education Statistics (NCES) in recent NAEP publications. A more complete description of the performance standard can be found in Appendix B.

- Percentage of all public school students who scored at the Proficient or Advanced level in reading, thus meeting the Goals Panel's performance standard (1992).² ■

- Grade 4	—	26%
-----------	---	-----

Direct Measures of the Goal: Advanced Placement Participation and Performance

- Number of Advanced Placement examinations taken in the following subject areas (per 1,000 11th and 12th graders; 1991, 1993).⁹

- English, mathematics, science, and history Number receiving grades of 3 or higher	161 114	177 126
- Foreign languages Number receiving grades of 3 or higher	5 3	4 3
- Fine arts Number receiving grades of 3 or higher	10 9	14 12

Additional Important Information: Participation in Challenging Courses

- Estimated percentage of public high school students taking the following courses (1989, 1991).¹⁰

- Algebra I	82%	95+%
- Algebra II	63%	66%
- Calculus	13%	15%
- Biology	80%	95+%
- Chemistry	37%	38%
- Physics	20%	16%

Goal 3: Mathematics Achievement

Percentage of all public school students who met the Goals Panel's performance standard¹ in mathematics (1990, 1992)

¹ The Goals Panel's performance standard is "mastery over challenging subject matter" as indicated by performance at the Proficient or Advanced levels on the National Assessment of Educational Progress (NAEP). These levels were established by the National Assessment Governing Board (NAGB) and reported by the National Center for Education Statistics (NCES) in recent NAEP publications. A more complete description of the performance standard can be found in Appendix B.

Goal 4: Science and Mathematics

Direct Measures of the Goal: International Student Achievement Comparisons

- Percentage of public school 8th graders who scored at the Proficient or Advanced level in mathematics compared with 3 highest achieving nations (1991 and 1992).¹¹

Taiwan = 41% Korea = 37% Switzerland = 33% — 27%

Direct Measures of the Objectives: Strengthening Science and Mathematics Education

- Percentage of public school 8th graders (1990, 1992).¹²
 - a) whose teachers report that they do these activities in mathematics class:
 - work in small groups at least once a week — 51%
 - work with measuring instruments or geometric solids at least once a week — 4%
 - b) whose mathematics teachers heavily emphasize:
 - Algebra and functions — 59%
 - developing reasoning ability to solve unique problems — 49%
 - communicating mathematics ideas — 36%
 - c) who have computers available in their mathematics classroom — 12%
 - d) who use calculators in mathematics class at least once a week — 77%
- Percentage of public school students enrolled in schools which had identified mathematics as a priority (1990, 1992).¹³
 - Grade 4 — 74%
 - Grade 8 — 64%

Direct Measures of the Objectives: Teacher Certification

- Percentage of public high school science teachers who are certified to teach science (1991).¹⁴ ●
 - Biology — 87%
 - Chemistry — 87%
 - Physics — 82%
 - Earth Science — 64%
- Percentage of public high school mathematics teachers who are certified to teach mathematics (1991).¹⁵ ● — 88%

Additional Important Information: Student Attitudes Toward Mathematics

- Percentage of public school students who reported positive attitudes toward mathematics (1990, 1992).¹⁶
 - Grade 4 — 69%
 - Grade 8 — 54%

WYOMING

Measuring State Progress Toward the Goals and Objectives

Goal 1: Children's Health Index

Percentage of infants born in the state with 1 or more health risks¹ (1990)

¹ Includes late (in third trimester) or no prenatal care, low maternal weight gain (less than 21 pounds), three or more older siblings, mother smoked during pregnancy, mother drank alcohol during pregnancy, or closely spaced birth (within 18 months of previous birth)

Source: National Center for Health Statistics and Westat, Inc., 1993

Goal 2: High School Dropouts

Percentage of all 16- to 19-year-olds¹ without a high school credential² (1980, 1990)

¹ Does not include those still in high school

² Includes traditional high school diploma and alternative credential

Source: Bureau of the Census, 1980 and 1990

Baseline
1993
Goals
Report

Goal 1: Readiness for School

Direct Measures of the Goal: School Readiness

No direct measure of children's early development and learning during the kindergarten year is available yet.

Direct Measures of the Objectives: Children's Health and Nutrition

- Number of births (per 1,000; 1988, 1990):¹

a) at or above 5.5 pounds	930	926
b) between 3.3 and 5.5 pounds	63	64
c) below 3.3 pounds	7	10
- Number of mothers (per 1,000; 1988, 1990) receiving first prenatal care during:²

a) first trimester of pregnancy	784	806
b) second trimester of pregnancy	169	156
c) third trimester of pregnancy or never	46	38
- Percentage of infants born in the state with one or more of the following health risks (1990):³ ▲

— late (in third trimester) or no prenatal care		
— low maternal weight gain (less than 21 pounds)		
— three or more older siblings		
— mother smoked during pregnancy		
— mother drank alcohol during pregnancy		
— closely spaced birth (within 18 months of previous birth)		
a) no risks	—	50%
b) 1 or more risks	—	50%
c) 2 or more risks	—	17%
d) 3 or more risks	—	4%

Direct Measures of the Objectives: Preschool Programs

- Number of children with disabilities in preschool (per 1,000 3- to 5-year-olds; 1991, 1992)⁴

54	64
----	----

Goal 2: High School Completion

Direct Measures of the Goal: High School Completion

- Percentage of all adults with a high school credential (1990):⁵

a) 19- to 20-year-olds	90%	—
b) 23- to 24-year-olds	90%	—

Direct Measures of the Objectives: School Dropouts

- Percentage of all 16- to 19-year-olds without a high school credential (1990)⁶

7%	—

Goals
Report

Goal 3: Student Achievement and Citizenship

Direct Measures of the Goal: Student Achievement

- Percentage of all public school students who scored at the Proficient or Advanced level in mathematics, thus meeting the Goals Panel's performance standard (1990, 1992):⁷
 - Grade 4 — 24% 19%^{ns}
 - Grade 8 — 26%^{ns}
- Percentage of all public school students who scored at the Proficient or Advanced level in reading, thus meeting the Goals Panel's performance standard (1992):⁸
 - Grade 4 — 28%

Direct Measures of the Goal: Advanced Placement Participation and Performance

- Number of Advanced Placement examinations taken in the following subject areas (per 1,000 11th and 12th graders; 1991, 1993):⁹
 - English, mathematics, science, and history
Number receiving grades of 3 or higher 30 37
19 23
 - Foreign languages
Number receiving grades of 3 or higher <1 1
<1 1
 - Fine arts
Number receiving grades of 3 or higher <1 <1
<1 <1

Additional Important Information: Participation in Challenging Courses

- Estimated percentage of public high school students taking the following courses (1989, 1991):¹⁰
 - Algebra I 73% 95+%
 - Algebra II 29% 59%
 - Calculus 8% 16%
 - Biology 86% 82%
 - Chemistry 36% 36%
 - Physics 16% 18%

Goal 3: Mathematics Achievement

Percentage of all public school students who met the Goals Panel's performance standard¹ in mathematics (1990, 1992)

¹ The Goals Panel's performance standard is "mastery over challenging subject matter" as indicated by performance at the Proficient or Advanced levels on the National Assessment of Educational Progress (NAEP). These levels were established by the National Assessment Governing Board (NAGB) and reported by the National Center for Education Statistics (NCES) in recent NAEP publications. A more complete description of the performance standard can be found in Appendix B.

Goal 4: Science and Mathematics

Direct Measures of the Goal: International Student Achievement Comparisons

- Percentage of public school 8th graders who scored at the Proficient or Advanced level in mathematics compared with 3 highest achieving nations (1991 and 1992).¹¹

Taiwan = 41% Korea = 37% Switzerland = 33% — 26%

Direct Measures of the Objectives: Strengthening Science and Mathematics Education

- Percentage of public school 8th graders (1990, 1992).¹²

a) whose teachers report that they do these activities in mathematics class:

- work in small groups at least once a week 70% 58%
- work with measuring instruments or geometric solids at least once a week — 8%

b) whose mathematics teachers heavily emphasize:

- Algebra and functions 48% 47% ns
- developing reasoning ability to solve unique problems 37% 40% ns
- communicating mathematics ideas 37% 32% ns

c) who have computers available in their mathematics classroom

25% 18% ns

d) who use calculators in mathematics class at least once a week

54% 73%

- Percentage of public school students enrolled in schools which had identified mathematics as a priority (1990, 1992).¹³

- Grade 4 — 69%
- Grade 8 43% 51%

Direct Measures of the Objectives: Teacher Certification

- Percentage of public high school science teachers who are certified to teach science (1991).¹⁴ ●

- Biology — 96%
- Chemistry — 94%
- Physics — 93%
- Earth Science — 97%

- Percentage of public high school mathematics teachers who are certified to teach mathematics (1991).¹⁵ ●

— 92%

Additional Important Information: Student Attitudes Toward Mathematics

- Percentage of public school students who reported positive attitudes toward mathematics (1990, 1992).¹⁶

- Grade 4 — 74%
- Grade 8 55% 58% ns

Measuring State Progress Toward the Goals and Objectives

Baseline
1993
Goals
Report

Goal 1: Readiness for School

Direct Measures of the Goal: School Readiness

No direct measure of children's early development and learning during the kindergarten year is available yet.

Direct Measures of the Objectives: Children's Health and Nutrition

- Number of births (per 1,000; 1988, 1990):¹
 - a) at or above 5.5 pounds — —
 - b) between 3.3 and 5.5 pounds — —
 - c) below 3.3 pounds — —
- Number of mothers (per 1,000; 1988, 1990) receiving first prenatal care during:²
 - a) first trimester of pregnancy — —
 - b) second trimester of pregnancy — —
 - c) third trimester of pregnancy or never — —
- Percentage of infants born in the state with one or more of the following health risks (1990):³ ▲
 - late (in third trimester) or no prenatal care
 - low maternal weight gain (less than 21 pounds)
 - three or more older siblings
 - mother smoked during pregnancy
 - mother drank alcohol during pregnancy
 - closely spaced birth (within 18 months of previous birth)
 - a) no risks — —
 - b) 1 or more risks — —
 - c) 2 or more risks — —
 - d) 3 or more risks — —

Direct Measures of the Objectives: Preschool Programs

- Number of children with disabilities in preschool (per 1,000 3- to 5-year-olds; 1991, 1992)⁴ — —

Goal 2: High School Completion

Direct Measures of the Goal: High School Completion

- Percentage of all adults with a high school credential (1990):⁵
 - a) 19- to 20-year-olds — —
 - b) 23- to 24-year-olds — —

Direct Measures of the Objectives: School Dropouts

- Percentage of all 16- to 19-year-olds without a high school credential (1990)⁶ — —

— Data not available
ns Interpret with caution. Change was not statistically significant.

▲ Interpret with caution. See technical note on page 234.

Goal 3: Student Achievement and Citizenship

Direct Measures of the Goal: Student Achievement

- Percentage of all public school students who scored at the Proficient or Advanced level in mathematics, thus meeting the Goals Panel's performance standard (1990, 1992):⁷ ■
 - Grade 4 — —
 - Grade 8 — —
- Percentage of all public school students who scored at the Proficient or Advanced level in reading, thus meeting the Goals Panel's performance standard (1992):⁸ ■
 - Grade 4 — —

Direct Measures of the Goal: Advanced Placement Participation and Performance

- Number of Advanced Placement examinations taken in the following subject areas (per 1,000 11th and 12th graders; 1991, 1993):⁹
 - English, mathematics, science, and history
Number receiving grades of 3 or higher — —
 - Foreign languages
Number receiving grades of 3 or higher — —
 - Fine arts
Number receiving grades of 3 or higher — —

Additional Important Information: Participation in Challenging Courses

- Estimated percentage of public high school students taking the following courses (1989, 1991):¹⁰
 - Algebra I — —
 - Algebra II — —
 - Calculus — —
 - Biology — —
 - Chemistry — —
 - Physics — —

— Data not available

Goal 4: Science and Mathematics

Direct Measures of the Goal: International Student Achievement Comparisons

- Percentage of public school 8th graders who scored at the Proficient or Advanced level in mathematics compared with 3 highest achieving nations (1991 and 1992):¹¹

Taiwan = 41% Korea = 37% Switzerland = 33% — —

Direct Measures of the Objectives: Strengthening Science and Mathematics Education

- Percentage of public school 8th graders (1990, 1992):¹²
 - a) whose teachers report that they do these activities in mathematics class:
 - work in small groups at least once a week
 - work with measuring instruments or geometric solids at least once a week
 - b) whose mathematics teachers heavily emphasize:
 - Algebra and functions
 - developing reasoning ability to solve unique problems
 - communicating mathematics ideas
 - c) who have computers available in their mathematics classroom
 - d) who use calculators in mathematics class at least once a week
- Percentage of public school students enrolled in schools which had identified mathematics as a priority (1990, 1992):¹³
 - Grade 4
 - Grade 8

Direct Measures of the Objectives: Teacher Certification

- Percentage of public high school science teachers who are certified to teach science (1991):¹⁴ ●
 - Biology
 - Chemistry
 - Physics
 - Earth Science
- Percentage of public high school mathematics teachers who are certified to teach mathematics (1991):¹⁵ ●

Additional Important Information: Student Attitudes Toward Mathematics

- Percentage of public school students who reported positive attitudes toward mathematics (1990, 1992):¹⁶
 - Grade 4
 - Grade 8

APPENDIX B

TECHNICAL NOTES

General Information

Accuracy of Data

The accuracy of any statistic is determined by the joint effects of "sampling" and "nonsampling" errors. Estimates based on a sample will differ somewhat from the figures that would have been obtained if a complete census had been taken using the same survey instruments, instructions, and procedures. In addition to such sampling errors, all surveys, both universe and sample, are subject to design, reporting, and processing errors and errors due to nonresponse. To the extent possible, these nonsampling errors are kept to a minimum by methods built into the survey procedures. In general, however, the effects of nonsampling errors are more difficult to gauge than those produced by sampling variability.

Sampling Errors

The samples used in surveys are selected from a large number of possible samples of the same size that could have been selected using the same sample design. Estimates derived from the different samples would differ from each other. The difference between a sample estimate and the average of all possible samples is called the sampling deviation. The standard or sampling error of a survey estimate is a measure of the variation among the estimates from all possible samples and, thus, is a measure of the precision with which an estimate from a particular sample approximates the average result of all possible samples.

The sample estimate and an estimate of its standard error permit us to construct interval estimates with prescribed confidence that the interval includes the average result of all possible samples. If all possible samples were selected under essentially the same conditions and an estimate and its estimated standard error were calculated from each sample, then: 1) approximately 2/3 of the intervals from one standard error below the estimate to one standard error above the estimate would include the average value of the possible samples; and 2) approximately 19/20 of the intervals from two standard errors above the estimate to two standard errors below the estimate would include the average value of all possible samples. We call an interval from two standard errors below the

estimate to two standard errors above the estimate a 95 percent confidence interval.

Analysis of standard errors can help assess how valid a comparison between two estimates might be. The standard error of a difference between two independent sample estimates is equal to the square root of the sum of the squared standard errors of the estimates. The standard error (se) of the difference between independent sample estimates "a" and "b" is:

$$se_{a,b} = \sqrt{se_a^2 + se_b^2}$$

Nonsampling Errors

Universe and sample surveys are subject to nonsampling errors. Nonsampling errors may arise when respondents or interviewers interpret questions differently; when respondents must estimate values; when coders, keyers, and other processors handle answers differently; when persons who should be included in the universe are not; or when persons fail to respond (completely or partially). Nonsampling errors usually, but not always, result in an understatement of total survey error and thus an overstatement of the precision of survey estimates. Since estimating the magnitude of nonsampling errors often would require special experiments or access to independent data, these magnitudes are seldom available.

Baseline and 1993 Goals Report

State data may be presented in this Report in one or both of two columns — *Baseline* or *1993 Goals Report*. Data reported for the first time in this Report will be presented in the column labeled *1993 Goals Report*. Data that have been reported in previous Goals Reports (1991 and/or 1992) will be presented in the column labeled *Baseline*.

Goal 1

Prenatal Care and Low Birthweight

Prenatal care refers to the first visit for health care services during pregnancy.

For the low-birthweight and prenatal care indicators, the numbers of cases reported as "not stated" were distributed among the reporting categories. Numbers may not add up to 1,000 due to rounding.

Children's Health Index

The percentages of infants at risk are based on the number of births used to calculate the health index, not the actual number of births. The percentage of complete and usable birth records used varied from a high of 99.88 to a low of 71.68. Five states (California, Indiana, New York, Oklahoma, and South Dakota) did not collect information on all six risks and are not included in this Report.

Children with Disabilities

The Individuals with Disabilities Act (IDEA) supports the improvement of services for very young children with disabilities through several programs, including the Program for Infants and Toddlers with Disabilities (Part H), the Preschool Grants Program (Section 619 of Part B), and the Early Education Program for Children with Disabilities (Section 623 of Part C). The Congressional mandate required states to have a mandate in place by school year 1991-92 that ensures a free appropriate public education (FAPE) for all eligible 3- to 5-year-old children with disabilities. By the end of 1990, only seven states and the Northern Marianas had not yet passed mandates for preschool services. By July 1991, all states had enacted a mandate with the exception of Oregon, which passed a mandate to go into effect in the 1992-93 school year.

Data are based on state information submitted to the U.S. Office of Special Education and Rehabilitative Services (OSERS) on the number of children with disabilities served under the IDEA, Part B and Chapter 1 (ESEA State-Operated Programs [SOP]) programs.

Goal 2

High School Completion

There are two major paths to high school completion. Most students receive a regular high school diploma after completing the requisite secondary school coursework. Other students, regardless of the number of high school courses they have completed, receive an alternative credential such as a General Educational Development (GED) certificate, Individual Education Plan (IEP) credential, or certificate of attendance. The high school completion rate for this Report was calculated by combining data for students

receiving regular high school diplomas with data for students receiving alternative credentials.

High School Completion and Dropout Rates

The 1990 Decennial Census data used in computing state high school completion rates are from special tabulations of the Census sample detail file. That file included data on current high school enrollment and high school graduation status. Those data were used in conjunction with Census single-year-of-age population data. By definition, the high school completion rates for 19- to 20-year-olds and 23- to 24-year-olds are computed as a percentage of the non-high school enrolled population at these ages who possess a high school credential (either a high school diploma or an alternative credential). The status dropout rate for 16- to 19-year-olds is computed as a percentage of all 16- to 19-year-olds who are not currently enrolled in high school and have not graduated from high school.

The Census data collection procedures count each person at his or her current location. As a result, 16- to 19-year-olds who graduated from high school and moved to another location for college or work are counted at their new location. This has the potential for artificially lowering the dropout rate in areas with universities, colleges, or employment opportunities, and artificially increasing the dropout rate in areas that graduates leave.

Goal 3

National Assessment Governing Board (NAGB) Achievement Levels

The National Assessment of Educational Progress (NAEP) data shown under Goal 3 should be interpreted with caution. The line signifying the *Goals Panel Performance Standard* classifies student performance according to achievement levels devised by the National Assessment Governing Board (NAGB). These achievement level data have been published previously by the National Center for Education Statistics (NCES). Students with NAEP scores falling below the *Goals Panel Performance Standard* have been classified by NAGB as "Basic" or below; those above have been classified as "Proficient" or "Advanced."

Basic: *This level, below proficient, denotes partial mastery of knowledge and skills that are fundamental for proficient work at each grade — 4, 8, and 12. For 12th grade, this level is higher than minimum competency skills (which are normally taught in elementary and junior*

high school) and covers significant elements of standard high school-level work.

Proficient: *This central level represents solid academic performance for each grade tested — 4, 8, and 12. It reflects a consensus that students reaching this level have demonstrated competency over challenging subject matter and are well prepared for the next level of schooling. At Grade 12, the proficient level encompasses a body of subject-matter knowledge and analytical skills, and of cultural literacy and insight, that all high school graduates should have for democratic citizenship, responsible adulthood, and productive work.*

Advanced: *This higher level signifies superior performance beyond proficient grade-level mastery at Grades 4, 8, and 12. For 12th grade, the advanced level shows readiness for rigorous college courses, advanced training, or employment requiring advanced academic achievement.*

The NAGB achievement levels were determined through reasoned judgements of what students should know and be able to do. They are attempts to characterize overall student performance in particular subject matter. They are also consistent with the Panel's efforts to report such performance against a high criterion standard. However, the methods used to derive the NAGB achievement "cut points" (i.e., the points distinguishing the percentage of students scoring at the different achievement levels) have been questioned along with the degree to which the NAGB achievement levels describe what students at each level actually know and can do.

The Goals Panel acknowledges these concerns but believes that, used with caution, the achievement levels convey important information about how American students are faring in reaching Goal 3. The Panel will continue to monitor subsequent work in achievement level construction and validation, and reserves the right to alter its reporting approaches based on new findings.

Advanced Placement Program

The Advanced Placement (AP) program, sponsored by The College Board, provides a way for high schools to offer college-level coursework to students. At present, one or more course descriptions, examinations, and sets of curricular materials are available in art, biology, chemistry, computer science, economics, English, French, German, government and politics, history, Latin, mathematics, music, physics, and Spanish. Advanced Placement examinations, which are given in May, are graded on a five-point scale: 5 - extremely well qualified; 4 - well qualified; 3 - quali-

fied; 2 - possibly qualified; and 1 - no recommendation. Grades of 3 and above generally are accepted for college credit and advanced placement at participating colleges and universities.

The National Education Goals Panel reports AP data in six subject areas: English, mathematics, science, history, foreign languages, and fine arts. English includes: English Language and Composition, and English Literature and Composition. Mathematics includes: Calculus AB and Calculus BC. Science includes: Biology, Chemistry, Physics B, Physics C—Mechanics, and Physics C—Electricity and Magnetism. History includes: U.S. History and European History. Foreign languages include: French Language, French Literature, Spanish Language, Spanish Literature, and German. Fine arts include: Art History, Studio Art (Drawing and General), and Music Theory. Two Advanced Placement measures for the subject areas are included in this Report: the number of examinations per 1,000 11th and 12th graders and the number of examinations graded 3 or above per 1,000 11th and 12th graders. The number of 11th and 12th graders includes public and private students. The enrollment figures were arrived at by multiplying the public enrollment by a private-enrollment adjustment factor. For the purposes of this Report, English, mathematics, science, and history were reported together.

Course Enrollments

In 1990, the Council of Chief State School Officers (CCSSO) reported high school course enrollment data for 38 states. Between the data collection periods for Fall 1989 and Fall 1991, 12 states changed their data collection forms. Changes in forms can produce significant differences in course enrollments for some categories. Due to budgetary constraints, three states reporting 1989 data could not report data for 1991 (Illinois, Louisiana, and Maryland), and three additional states began reporting data in 1991 (Colorado, Oregon, and Vermont). California's data are from Fall 1989 and Fall 1990. North Carolina's data and Wisconsin's data are from Fall 1988 and Fall 1991. Because of these inconsistencies in reporting, the baseline year will vary by state.

International Student Achievement Comparisons

International comparisons have been drawn between countries participating in the 1991 International Assessment of Educational Progress (IAEP) and states participating in the 1992 NAEP. Samples of 9- and 13-year-old students in public and private schools

were tested in mathematics in 20 countries. Those countries decided to adopt the 1990 NAEP objectives in mathematics as a blueprint for the construction of the IAEP mathematics assessment. Even with differences in the target population and timing, there was substantial overlap between the NAEP and the IAEP. By linking the IAEP scale to the NAEP scale, it is possible to predict the percentages of 13-year-olds in each of the 20 countries that participated in the 1991 IAEP in mathematics who would have performed at or above each of the three achievement levels (see technical notes for Goal 3) established by the NAGB for U.S. students. These predictions can then be compared with actual performance of U.S. 8th graders in public schools in the 1992 mathematics assessment with respect to these same criteria. For this Report, the highest-scoring countries (Korea, Taiwan, and Switzerland) were selected for comparison to the U.S. Mathematics data are presented only for the 42 states and territories that participated in the 1992 NAEP. Direct comparisons among these countries should be interpreted with caution.

Teacher Certification

The population of teachers includes those with a main and "other" assignment. The percentage certified refers to teachers with state certification in subject assigned to one or more period/class to subject. States have different requirements for teacher certification, which may explain the differing rates. For example, while all states had minimal certification requirements for mathematics teachers, the number of required semester course credits varied by state from 18 to 40. See the Council of Chief State School Officers' *State Indicators of Science and Mathematics Education: 1993* for more information on all certification requirements by state. California's data are from 1990. Colorado's Biology figures include all sciences.

Goal 5

Adult Literacy Scales

The Department of Education (ED) and the Educational Testing Service (ETS) characterized the literacy of America's adults in terms of three "literacy scales" representing distinct and important aspects of literacy: prose, document, and quantitative literacy. Each of the literacy scales, which range from 0 to 500, is as follows:

Prose literacy – the knowledge and skills needed to understand and use information from texts that include editorials, news stories, poems, and fiction; for example, finding a piece of information in a

newspaper article, interpreting instructions from a warranty, inferring a theme from a poem, or contrasting views expressed in an editorial.

Level 1 – Most of the tasks in this level require the reader to read relatively short text to locate a single piece of information which is identical to or synonymous with the information given in the question or directive. If plausible but incorrect information is present in the text, it tends not to be located near the correct information.

Level 2 – Some tasks in this level require readers to locate a single piece of information in the text; however, several distractors or plausible but incorrect pieces of information may be present, or low-level inferences may be required. Other tasks require the reader to integrate two or more pieces of information or to compare and contrast easily identifiable information based on a criterion provided in the question or directive.

Level 3 – Tasks in this level tend to require readers to make literal or synonymous matches between the text and information given in the task, or to make matches that require low-level inferences. Other tasks ask readers to integrate information from dense or lengthy text that contains no organizational aids such as headings. Readers may also be asked to generate a response based on information that can be easily identified in the text. Distracting information is present, but is not located near the correct information.

Level 4 – These tasks require readers to perform multiple-feature matches and to integrate or synthesize information from complex or lengthy passages. More complex inferences are needed to perform successfully. Conditional information is frequently present in tasks at this level and must be taken into consideration by the reader.

Level 5 – Some tasks in this level require the reader to search for information in dense text which contains a number of plausible distractors. Others ask readers to make high-level inferences or use specialized background knowledge. Some tasks ask readers to contrast complex information.

Document literacy – the knowledge and skills required to locate and use information contained in materials that include job applications, payroll forms, transportation schedules, maps, tables, and graphs; for example, locating a particular intersection on a street map, using a schedule to choose the

appropriate bus, or entering information on an application form.

Level 1 – Tasks in this level tend to require the reader either to locate a piece of information based on a literal match or to enter information from personal knowledge onto a document. Little, if any, distracting information is present.

Level 2 – Tasks in this level are more varied than those in Level 1. Some require the readers to match a single piece of information; however, several distractors may be present, or the match may require low-level inferences. Tasks in this level may also ask the reader to cycle through information in a document or to integrate information from various parts of a document.

Level 3 – Some tasks in this level require the reader to integrate multiple pieces of information from one or more documents. Others ask readers to cycle through rather complex tables or graphs which contain information that is irrelevant or inappropriate to the task.

Level 4 – Tasks in this level, like those at the previous levels, ask readers to perform multiple-feature matches, cycle through documents, and integrate information; however, they require a greater degree of inferencing. Many of these tasks require readers to provide numerous responses but do not designate how many responses are needed. Conditional information is also present in the document tasks at this level and must be taken into account by the reader.

Level 5 – Tasks in this level require the reader to search through complex displays that contain multiple distractors, to make high-level text-based inferences, and to use specialized knowledge.

Quantitative literacy – the knowledge and skills required to apply arithmetic operations, either alone or sequentially, using numbers embedded in printed materials; for example, balancing a checkbook, figuring out a tip, completing an order form, or determining the amount of interest from a loan advertisement.

Level 1 – Tasks in this level require readers to perform single, relatively simple arithmetic operations, such as addition. The numbers to be used are provided and the arithmetic operation to be performed is specified.

Level 2 – Tasks in this level typically require readers to perform a single operation using numbers that are either stated in the task or easily located in the material. The operation to be performed may be stated in the question or easily determined from the format of the material (for example, an order form).

Level 3 – In tasks in this level, two or more numbers are typically needed to solve the problem, and these must be found in the material. The operation(s) needed can be determined from the arithmetic relation terms used in the question or directive.

Level 4 – These tasks tend to require readers to perform two or more sequential operations or a single operation in which the quantities are found in different types of displays, or the operations must be inferred from semantic information given or drawn from prior knowledge.

Level 5 – These tasks require readers to perform multiple operations sequentially. They must disembed the features of the problem from text or rely on background knowledge to determine the quantities or operations needed.

Twelve states (California, Florida, Illinois, Indiana, Iowa, Louisiana, New Jersey, New York, Ohio, Pennsylvania, Texas, and Washington) participated in the 1992 State Adult Literacy Survey. Data collection was conducted in Florida on a separate schedule, and adult literacy results were not available in time for inclusion in this Report. The Oregon Progress Board conducted an independent study in 1990, which was validated by the Educational Testing Service. Adults aged 16-65 participated in the 1990 Oregon study; in other states which participated in 1992, the sample included adults aged 16 and older.

Goal 6

Student Drug Use

The information from the Youth Risk Behavior Surveillance Survey includes only states with weighted data. Only four states (Georgia, New Mexico, South Dakota, and Utah) had weighted data for both years. The wording in the survey questions changed between 1990 and 1991, which may have accounted for significant differences detected in New Mexico. Because of these inconsistencies in reporting, the baseline year will vary by state.

Acknowledgements

The Panel and Executive Staff gratefully acknowledge the contributions of many thoughtful and knowledgeable people during the development of this Report. People served on Working Groups as principal advisors to the Panel or on Resource Groups and Technical Planning Subgroups convened to advise the Panel on how to measure and report progress toward achieving the six National Education Goals. Other people were invaluable consultants offering their expertise on issues related to each Goal, on data acquisition and analysis, and in report production. We extend a special thanks to Andrew Cunningham, the representative of the 1992-93 Chair of the Panel, Governor Nelson of Nebraska, for his dedication and thoughtfulness. We remain appreciative of the good counsel and support we received from all.

WORKING GROUP

Congressional Representatives

Elizabeth Beck, U.S. Senate, Office of Senator Bingaman
Doris Dixon, U.S. Senate, Office of Senator Cochran
Andrew Hartman, U.S. House of Representatives, Office of Representative Goodling
Jeffrey MacFarland, U.S. House of Representatives, Office of Representative Kildee
Ray Ramirez, U.S. Senate, Office of Senator Bingaman
Diane Stark, U.S. House of Representatives, Office of Representative Kildee
David Thompson, U.S. Senate, Office of Senator Bingaman
Susan Wilhelm, U.S. House of Representatives, Office of Representative Kildee

Governors' Representatives

Donna Chitwood, Office of the Governor of Colorado
Nancy Cobb, Office of the Governor of Indiana
Andrew Cunningham, Office of the Governor of Nebraska

RESOURCE GROUPS AND TECHNICAL PLANNING SUBGROUPS

GOAL 1: READINESS FOR SCHOOL

Resource Group Convener: Ernest Boyer, The Carnegie Foundation for the Advancement of Teaching

Members:

James Comer, Yale University
Donna Foglia, Evergreen School District, California
Peter Gerber, MacArthur Foundation
Sarah Greene, National Head Start Association
Sharon Lynn Kagan, Yale University
William Kolberg, National Alliance of Business
Luis Laosa, Educational Testing Service
Michael Levine, Carnegie Corporation of New York
Samuel Meisels, University of Michigan
Evelyn Moore, National Black Child Development Institute
Lucile Newman, Brown University
Douglas Powell, Purdue University
Julius Richmond, Harvard Medical School
Marilyn Smith, National Association for the Education of Young Children
James Wilsford, Jim Wilsford Associates, Inc.
Nicholas Zill, Westat, Inc.

Technical Planning Group on Readiness for School Leader:
Sharon Lynn Kagan, Yale University

Members:

Ernest Boyer, The Carnegie Foundation for the Advancement of Teaching
Sue Bredekamp, National Association for the Education of Young Children

M. Elizabeth Graue, University of Wisconsin
 Luis Laosa, Educational Testing Service
 Samuel Meisels, University of Michigan
 Evelyn Moore, National Black Child Development Institute
 Lucile Newman, Brown University
 Lorrie Shepard, University of Colorado
 Valora Washington, The Kellogg Foundation
 Nicholas Zill, Westat, Inc.

Consultants for Technical Planning Group on Readiness for School:

Scarvia Anderson, Education Advisor
 Ira Blake, Teachers College, Columbia University
 Lois Bloom, Teachers College, Columbia University
 Barbara Bowman, Erikson Institute
 Bettye Caldwell, University of Arkansas at Little Rock
 Richard Duran, University of California, Santa Barbara
 Richard Figueroa, University of California, Santa Cruz
 Eugene Garcia, University of California, Santa Cruz
 Elvie Germino Hausken, U.S. Department of Education
 Carollee Howes, University of California, Los Angeles
 Constance Kamii, University of Alabama at Birmingham
 Lilian Katz, ERIC Clearinghouse on Elementary and Early Childhood Education
 Ivor Pritchard, U.S. Department of Education
 Jack Shonkoff, University of Massachusetts - Worcester
 Barbara Smith, Allegheny-Singer Research Institute
 Jerry West, U.S. Department of Education
 Dennie Wolf, Harvard University
 Daria Zvetina, Erikson Institute

GOAL 2: HIGH SCHOOL COMPLETION

Resource Group Conveners: Rafael Valdivieso, Academy for Educational Development, Inc.

Members:

Janet Baldwin, General Education Development Testing Service
 José Cardenas, The Intercultural Development Research Association
 Barbara Clements, Council of Chief State School Officers
 Edmond Gordon, City College of New York
 Noreen López, Illinois State Board of Education
 Steven Neilson, Millman and Robertson, Inc.
 Aaron Pallas, Michigan State University
 Richard Wallace, Pittsburgh Public Schools

Technical Planning Subgroup on Core Data Elements Leader:
 Barbara Clements, Council of Chief State School Officers

Members:

Linda Baker, Maryland State Department of Education
 Paul Barton, Educational Testing Service
 Matthew Cohen, Ohio Department of Education
 Dennis Jones, National Center for Higher Education Management Systems
 Glynn Ligon, Evaluation Software Publication
 John Porter, Urban Education Alliance, Inc.
 Ramsay Selden, Council of Chief State School Officers
 Nicholas Zill, Westat, Inc.

Consultants for Technical Planning Subgroup on Core Data Elements:

Lou Danielson, U.S. Department of Education
 Lee Hoffman, U.S. Department of Education

GOAL 3: STUDENT ACHIEVEMENT AND CITIZENSHIP

Resource Group Convener: Lauren Resnick, University of Pittsburgh

Members:

Gordon Ambach, Council of Chief State School Officers
 Chester Finn, Jr., Edison Project
 Asa Hilliard, Georgia State University
 David Hornbeck, Education Advisor
 Richard Mills, Vermont Department of Education
 Claire Pelton, San Jose Unified School District

Goal 3/4 NAEP Technical Advisory Subgroup Leader:
 Ramsay Selden, Council of Chief State School Officers

Members:

Eva Baker, University of California, Los Angeles
 Dorothy Gifford, National Academy of Sciences
 Robert Glaser, University of Pittsburgh
 Steven Leinwand, Connecticut State Department of Education
 Robert Linn, University of Colorado
 Michael Nettles, University of Michigan
 Santa Raizen, National Center for Improving Science Education
 William Schmidt, Michigan State University
 Elizabeth Stage, National Research Council
 Uri Treisman, University of Texas, Austin

Consultants for NAEP Technical Advisory Subgroup:

John Burkett, U.S. Department of Education
 Stanley Jones, Office of the Governor of Indiana
 Susan Loomis, American College Testing
 Gail MacColl, General Accounting Office
 Jeffrey MacFarland, U.S. House of Representatives, Office of Representative Kildee
 Nikki McNamee, Office of the Governor of South Carolina
 Fritz Mulhauser, General Accounting Office
 Mark Reckase, American College Testing
 Susan Wilhelm, U.S. House of Representatives, Office of Representative Kildee

GOAL 4: SCIENCE AND MATHEMATICS

Resource Group Convener: Alvin Trivelpiece, Oak Ridge National Laboratory

Members:

Iris Carl, National Council of Teachers of Mathematics
 Kenneth Lay, IBM
 Steven Leinwand, Connecticut State Department of Education
 Michael Nettles, University of Tennessee
 Alba Ortiz, University of Texas, Austin

Senta Raizen, National Center for Improving Science Education
Ramsay Selden, Council of Chief State School Officers

Goal 3/4 Standards Review Technical Planning Subgroup

Leader: Shirley Malcom, American Association for the Advancement of Science

Members:

Iris Carl, National Council of Teachers of Mathematics
David Cohen, Michigan State University
Thomas Crawford, U.S. Olympic Committee
Mihaly Csikszentmihalyi, University of Chicago
Phillip Daro, University of California
Chester Finn, Jr., Edison Project
Anne Heald, University of Maryland
David Hornbeck, Education Advisor
David Kearns, Xerox Corporation
Michael Kirst, Stanford University
Richard Mills, Vermont Department of Education
Harold Noah, Teachers College, Columbia University
Clare Pelton, San Jose Unified School District
James Renier, Honeywell Corporation
Sidney Smith, Coalition of Essential Schools/Atlas

Consultants for Goal 3/4 Standards Review Technical Planning Subgroup:

Jan Anderson, U.S. Department of Education
Diane Massell, Rutgers University

GOAL 5: ADULT LITERACY AND LIFELONG LEARNING
